#### **II.2.4. Description of the procurement**

The LUT Universities are looking for an automated assessment system for grading programming submissions. The aim of this investment is to acquire Software as a Service solution integrated to LUT Moodle learning management system.

LUT University departments of software engineering, computational engineering, electrical engineering and mathematics produce circa 100 000 submissions per year over dozens of courses and the grading of this number of submissions is not possible without automation. The number of submissions by students is expected to increase.

The universities are looking for an easy-to-use and maintain SaaS-based solution that does not require a lot of integration work or education for teachers or students. The acquired solution is aimed to replace many of the existing SaaS and inhouse solutions to automatically assess code submissions.
