VI.3. Additional information

The Trust wishes to receive options for the provision of a multi-storey car park on the Leicester Royal Infirmary site.

Options are to be predicated on a design, fund, build and operate basis following a feasibility study

Construction anticipated to be completed by December 2015

The solution is the provision of an on- site multi storey car park the location of which should be complementary to the orientation of main entrances to the Hospital and also designed to improve traffic flow on adjacent highways and roads which currently are congested due to backing up of queuing traffic for existing flat level car park.

The bidder is asked to approach the submission on the basis of "as known" data sets. This means that the current configuration of services and footfall is used as the quantum to assess commercial solutions.

The proposal should provide for transparent pricing and the prospective footprint, design and subsequent development of the car park should take into account all known requirements for highways and travel, discernible from the current pre-planning discussions with Leicester City Council.

A pre-qualification questionnaire and memorandum of information may be issued. The trust will not be liable for any bidding costs of any of the participating organisations.
