General public services

**Section II: Object**

---

**II.1. Scope of the procurement****II.1.1. Title**

Technology for Medical Distance Monitoring

Reference number: 201900443

**II.1.2. Main CPV code**

33000000 Medical equipments, pharmaceuticals and personal care products

**II.1.3. Type of contract**

Services

**II.1.4. Short description**

The welfare technology initiative in the Municipality of Oslo has an overall goal of increasing patients' safety, coping and activity level. In recent years, entities in the Oslo municipality have seen the need for alternative ways of following up patients with chronic diseases, mental disorders and cancer. There is a need to raise the quality and increase efficiency related to following up these user groups. The municipality of Oslo therefore wishes to establish a Framework Agreement for technology related to distance monitoring.

**II.1.5. Estimated total value**

Value excluding VAT: 70 000 000,00 NOK

**II.1.6. Information about lots**

This contract is divided into lots: no

**II.2. Description****II.2.2. Additional CPV code(s)**

33190000 Miscellaneous medical devices and products, 33196000 Medical aids, 33196100 Devices for the elderly, 33196200 Devices for the disabled, 35120000 Surveillance and security systems and devices, 35125100 Sensors, 48180000 Medical software package, 48814000 Medical information systems, 48814400 Clinical information system, 48814500 Casemix system, 85140000 Miscellaneous health services

**II.2.3. Place of performance**

NUTS code: NO011 Oslo

NUTS code: NO Norge

**II.2.4. Description of the procurement**

A national trial of distance monitoring, where 6 municipalities participate, is conducted by the Directorate of Health. Selected districts in the municipality of Oslo have tested distance monitoring with good results. Based on this, the City of Oslo wants to increase the use of distance monitoring and therefore establish a Framework Agreement that all entities in the municipality can call for.

The purpose of distance monitoring is to:

- give the patient increased feeling of security, independence, and increased life quality,
- increase the service capacity for the future.

Technology related to distance monitoring may be sensors or other medical measuring devices, which actively or passively measures vital/physiological values, and applications for documenting, follow-up, administration et cetera.

The Municipality of Oslo has now defined 8 main functions which it is desirable that the solution covers:

- A) function for digital self-measurement and documentation of measurements (values and self-reporting);
- B) function showing the development of the patient's state of health over time ("learning");
- C) function that alerts changes in the patient's state of health ("responding");
- D) function that contributes to increased self-management and increased ability to initiate own actions;

- E) function that reminds the patient to perform measurements and notifies if these are not performed;
- F) function that enables actors outside Oslo municipality to see the patient's measurements;
- G) function that enables 2-way communication with the patient without being physically present.

#### **II.2.5. Award criteria**

Price is not the only award criterion and all criteria are stated only in the procurement documents

#### **II.2.6. Estimated value**

#### **II.2.7. Duration of the contract, framework agreement or dynamic purchasing system**

Duration in months: 24
