Services

Service category No 27: Other services

Main site or place of performance: Netherlands.

NUTS code NL Nederland

II.1.3. Information about a framework agreement or a dynamic purchasing system (DPS)

II.1.4. Short description of the contract or purchase(s)

The procurement of real-time traffic data involves various kinds of data, such as point speeds, intensity levels, travel times, vehicle categories, etc. There are different technologies available for this, which vary in terms of their maturity and the quality of the data they produce. Real-time traffic data can be obtained for example by means of loops, cameras, infrared detectors,

radar, Bluetooth technology, in-car systems, etc. The data can also be supplied in the form of Floating Car Data (FCD). These methods do not all result in data of the highest quality. Given the developments in the market and the developments within NDW's partners, flexibility in the supply of traffic data is essential and a contract form is needed that allows for this. NDW has therefore decided on a contract structure that is particularly appropriate for this purpose. The use of framework agreements will give NDW the flexibility it desires. NDW will assign orders on behalf of its partners within the framework agreements. These orders could be regional in nature and/or related to the quality of the traffic data and/or the data acquisition method.

II.1.5. CPV code(s)

72319000 Data supply services

II.1.6. Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: yes

II.2. Total value of the contract/lot
