OJ S 122/2014 28/06/2014
Contract award notice
Supplies

Directive 2004/18/EC

Section I: Contracting authority

I.1. Name and addresses

Official name: St. Olavs Hospital HF
Postal address: Olav Kyrres gate 6
Town: Trondheim
Postal code: 7030
Country: Norway
For the attention of: Terje Haarberg
E-mail: terje.haarberg@stolav.no
Telephone: +47 72822379

I.2. Type of the contracting authority

National or federal agency/office

I.3. Main activity

Health

I.4. Contract award on behalf of other contracting authorities

The contracting authority is purchasing on behalf of other contracting authorities: no

Section II: Object of the contract

II.1. Description

II.1.1. Title

Procurement of EUS equipment for Medical Clinic for St. Olav's Hospital HF.

II.1.2. Type of contract and place of performance or delivery

Supplies

Purchase

Main site or place of performance: Trondheim, Norway.

NUTS code NO06 Trøndelag

II.1.3. Information about a framework agreement or a dynamic purchasing system (DPS)

II.1.4. Short description of the contract or purchase(s)

The requested equipment is needed for pre-surgery cancer staging. Gastro surgical department is dependent on having these examinations done prior to operation of oesophagus cancer and approx. 50 % of the procedures that are done with this equipment involves presurgery cancer staging. The equipment is also used for FNA for cancer diagnostics (ultrasound-guided Fine Needle Aspiration biopsy of tumours), for drainage of cysts and abscesses in the pancreas etc. New EUS equipment makes it possible to reach previously inaccessible areas of the intestine (duodenum) and is considerably more pleasant for the patient, thus permitting the contracting authority to do these procedures under sedation rather

than under general anaesthesia. The contracting authority points out that the procedures performed under general anaesthesia require the equipment to be moved to the patient, which places demands on equipment mobility.

Furthermore, it is emphasised that the risk of complications is significantly reduced by the use of EUS equipment for this type of treatment. We currently use radial endoscopes, linear endoscopes with light source, together with processors and ultrasonic devices for receiving and processing the images received from the endoscopes. The contracting authority requests tenders for similar equipment as described above.

The department/clinic currently performs an estimated 80 surveys per year with this equipment, and the contracting authority emphasises that they want the expected lifetime costs for the equipment and supplies specified in the tender. The number of examinations is increasing, and this puts demands on the expected life of the equipment offered in this tender procedure.

Provision of the required training for all personnel who work in the affected units must be included in the delivery.

The tender applies to the procurement of equipment for EUS treatment at the Medical Clinic at St.

EUS is currently performed using radial endoscopes and linear endoscopes with light source /processor, as well as an ultrasound device. The contracting authority currently has EUS equipment from 2006, and we would like this tendering procedure to look at alternative methods of "storing" new equipment for simplified use and logistics (see attached specifications).

The following equipment being sought in this competitive bidding:

1 radial endoscope;

1 linear endoscope;

1 light source/processor;

1 ultrasound device;

1 water pump to be able to flush water through the working luminal channel in the offered endoscope.

The contracting authority has opened the possibility to reuse existing linear endoscopes (see attached specifications) for the setting of coarse stents, e.g. drainage of pseudocysts from the pancreas. Tenderers are requested to include in their offer equipment that is compatible with this or offer a solution for linear endoscopes for placing rough stents. A separate line for this is given in Annex B, Price Schedule. The contracting authority will answer all questions, but answers cannot be expected after the stated deadline for questions in this competitive bidding.

II.1.5. CPV code(s)

33100000 Medical equipments, 33168000 Endoscopy, endosurgery devices

II.1.6. Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: yes

II.2. Total value of the contract/lot

II.2.1. Total value of the contract/lot

Section IV: Procedure

IV.1. Type of procedure

IV.1.1. Type of procedure

Open

IV.2. Award criteria

IV.2.1. Award criteria

The most economically advantageous tender in terms of

1. Price/lifetime costs. Weighting 40
2. Functionality, user friendliness and quality. Weighting 60

IV.2.2. Information about electronic auction

An electronic auction has been used: no

IV.3. Administrative information

IV.3.1. File reference number attributed by the contracting authority

14/632

IV.3.2. Previous publication concerning this procedure

Contract notice

Notice number in the OJ S: [2014/S 55-092924](#) of 19.3.2014

Section V: Award of contract

Lot title: Procurement of EUS equipment for Medical Clinic for St. Olav's Hospital HF

V.1. Date of conclusion of the contract

6.6.2014

V.2. Information about tenders

Number of tenders received by electronic means: 2

V.3. Name and address of the contractor

Official name: VINGMED AS

Postal address: Fjordveien 1

Town: Høvik

Postal code: 1323

Country: Norway

Telephone: +47 67580680

Fax: +47 67101212

V.4. Information on value of the contract/lot

V.5. Information about subcontracting

The contract is likely to be subcontracted: no

Section VI: Complementary information

VI.1. Information about European Union funds

The procurement is related to a project and/or programme financed by European Union funds:
no

VI.2. Additional information

VI.3. Procedures for review

VI.3.1. Review body

VI.3.2. Review procedure

VI.3.3. Service from which information about the review procedure may be obtained

VI.4. Date of dispatch of this notice

26.6.2014
