II.1.3. Type of contract

Works

II.1.4. Short description

Tønsberg Renseanlegg IKS will construct a new sludge unloading plant for lorries, with dewatering machines and sludge silos for temporary storage before it is transported further. The plant will be constructed to the south of the existing treatment plant, against the site border with Esso. It must be adapted to a future situation where the sludge is also treated in an external biogas plant. It must be possible to continue with the current system with unloading in a large sack from the existing sludge silo until the external treatment system is up and running. After the dewatering machines, lime is added to the sludge for sanitation for a temporary period until the external treatment system is established. 7 contracts, as stated in table 1, are planned for the project 'New Sludge Silo Building'. This enquiry concerns 'M2 — dewatering machines'.
