III.2. Conditions related to the contract

III.2.2. Contract performance conditions

It is a special condition relating to the performance of this contract that the applicants, members of bidding consortia and subcontractors have to declare the absence of a conflict of interest for participating in the procurement procedure.

A conflict of interest exists, in particular, for a (single) commercial importer/wholesaler of (German) wine. Due to the DWI's legal mandate and the European framework (Regulation (EU) No 1308/2013 and Notification SA.54935 (2019/N)), DWI may only carry out non-competitive worldwide marketing activities in cooperation with German producers. Therefore, any measures that are taken have to basically benefit all (wine) producers of the (wine) product type concerned. It is not possible for a (German) wine importing or distributing company to represent the entire German wine industry - which is, in line with the legal mandate of the DWI, the major task of the winning agency, since there would always be doubts about the neutrality of this company when it comes to promoting wine. For this reason, such entities or individuals are not permitted to participate in this procurement procedure, neither as applicants, members of a bidding consortium or as a sub-contractor.

In case of bidding consortia, a self-declaration is required from each individual member of the consortium. Any applicant, member of a bidding consortium or sub-contractor not submitting this declaration will be excluded from further participation.

Section IV: Procedure

IV.1. Description

IV.1.1. Type of procedure

Competitive procedure with negotiation

IV.1.3. Information about a framework agreement or a dynamic purchasing system

The procurement involves the establishment of a framework agreement

Framework agreement with a single operator

In the case of framework agreements, provide justification for any duration exceeding 4 years:

The German Wine Institute has been working with foreign agencies for over 30 years. These agencies act as official representatives of the German Wine Institute. The target group consists of German wine producers, the media, the gastronomy and trade sector including end consumers in the respective target countries. The experience of over 30 years has shown that it takes at least three years for an agency to develop a sufficient network of members of the aforementioned target group and to be perceived as a representative of German wines in the target country by this target group. From a marketing perspective it has been proven that the initial investments made only start to amortize after this point in time. From this point on, after having built the network with the media and the gastronomy and trade sector and the mentioned representation is achieved, agency services start to become effective in a marketing sense, which enables the agencies to place marketing strategies and goals in an efficient way. The necessary investment volume on both sides, on the service provider's and the client's side, is considered a recognized reason to deviate from the standard term of four (4) years for a framework contract by the public procurement jurisdiction.

IV.1.5. Information about negotiation

The contracting authority reserves the right to award the contract on the basis of the initial tenders without conducting negotiations
