Email: audun.torvik@kristiansund.kommune.no

Legal type of the buyer: Body governed by public law, controlled by a local authority

Activity of the contracting authority: General public services

2. Procedure

2.1. Procedure

Title: ICT Orkide - Individual procurement - Joint map management system - Qualification

Description: The procurement of a joint map management system for the ICT Orkidé municipalities. IKT ORKidé is an intermunicipal cooperation body that was established in 1997 and consists of nine municipalities in northern Vestlandet (Aure, Smøla, Sunndal, Surnadal, Rindal, Averøy, Gjemnes, Kristiansund and Tingvoll), with administration in Kristiansund.

Procedure identifier: 23dce36a-4e41-4ac7-a9f3-0d837f40581c

Internal identifier: 26/02430

Type of procedure: Negotiated with prior publication of a call for competition / competitive with negotiation

The procedure is accelerated: no

Main features of the procedure: The municipalities that are part of the intermunicipal cooperation currently have different map management systems from two different suppliers and these are also used differently from municipality to municipality. All have the same access system (joint procurement). It is important that the procurement contributes to increasing the efficiency of municipal administration and municipal services through a better and more efficient use of GIS and geodata. The services shall offer geodata, connect/integrate systems, register, analyse, automate, inform, etc. We want to focus on the importance of creating a common platform that gives the municipality larger and more robust professional environments. The main aim is to offer new, better and more efficient services in line with the above mentioned strategies. Many of the assignments in the municipality are completely or partly dependent on access to good map systems in order to read, edit and analyse geographical data. It is also especially important for inhabitants, leisure residents and businesses to have access to information from the land register and area plans. A procurement is open to possibilities to map and meet any needs that have previously been uncovered. This particularly applies within the focus areas for streamlining work assignments, cooperation and expanded use of geodata across municipal borders, and increased use of geographical information in analyses and decision basis. The delivery shall include all software, licences, installation, consultancy services, training, support, operation and maintenance that is necessary to fulfil the procurement's purpose.

2.1.1. Purpose

Main nature of the contract: Services

Main classification (cpv): 79300000 Market and economic research; polling and statistics

Additional classification (cpv): 79400000 Business and management consultancy and related services, 79900000 Miscellaneous business and business-related services
