Country: Norway

## Section II: Object of the contract

---

### II.1. Description

#### II.1.1. Title attributed to the contract by the contracting authority

Re-establishment of municipal infrastructure, Hjøλλo.

#### II.1.2. Type of contract and place of performance or delivery

Works

Execution

Main site or place of performance: Odda, Norway.

NUTS code NO051 Hordaland

#### II.1.3. Information about a framework agreement or a dynamic purchasing system

The notice involves a public contract

#### II.1.4. Information about framework agreement

#### II.1.5. Short description of the contract or purchase(s)

The tender is for a general contract for the construction of Hjøλλo bridge, adjoining concrete walls, road, water and sewage, electricity and tele installations.

This is a reconstruction after flood damage in autumn 2014.

#### II.1.6. CPV code(s)

45000000 Construction work

#### II.1.7. Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: yes

#### II.1.8. Lots

This contract is divided into lots: no

#### II.1.9. Information about variants

Variants will be accepted: no

### II.2. Scope of the procurement

#### II.2.1. Total quantity or scope

History:

On 29 and 30.10.2014 there was a big flood in Odda. Record measurements of the water flow were recorded in the river Opo, 780 m<sup>3</sup>/s. This led to massive damage along the river banks and 4 houses were taken by the flood waters.

Hjøλλo bridge is 1 of 4 road bridges in Odda that crosses the river Opo. The bridge was built in 1068/69 and it relieved a previous narrow truss bridge over the river. The bridge has now been demolished after the damage caused on 29 and 30.10.2014 and replaced by a temporary marbay bridge.

During the night the river sent approx. 1 m above the bridge plate on the eastern side (the Hjøλλo side) of the bridge. The river eventually dug behind and under the bridge arch on this side and the bridge sank down approx. 2 m. In November the bridge was opened again for traffic with its new and crooked position.

In the period after the flood, NVE has carried out major flood protection work by plastering large parts of the river course. The river course has also been straightened and lowered in parts. Downstream of Hjøλλo bridge the river course has been lowered and in addition the width of the

river in this area has been increased.

The existing bridge has been demolished and it shall be replaced with a new bridge with a somewhat greater span width.

In addition to the new bridge and the plastering work that has been carried out, a 300 m long concrete wall shall be set up on the Hjølle side. More plastering and preventive work shall also be carried out on both sides of the river in order to secure houses and areas by the river.

Estimated value excluding VAT:

Range: between 45 000 000 and 55 000 000 NOK

## **II.2.2. Information about options**

Options: no

## **II.2.3. Information about renewals**

This contract is subject to renewal: no

## **II.3. Duration of the contract or time limit for completion**

Start 8.12.2016. Completion 30.6.2018

## **Section III: Legal, economic, financial and technical information**

---

### **III.1. Conditions related to the contract**

#### **III.1.1. Deposits and guarantees required**

Contractors are to provide security in accordance with NS 8406 point 8.  
The Builder will not provide any security.
