Services

Service category No 1: Maintenance and repair services

Main site or place of performance: Bergen.

NUTS code NO051 Hordaland

**II.1.3. Information about a framework agreement or a dynamic purchasing system (DPS)**

**II.1.4. Short description of the contract or purchase(s)**

The Lepra Museum St. Jørgens Hospital is cultural monument of national significance. The Museum is administered and operated by Stiftelsen Bymuseet i Bergen. The church building is utilised as a museum in addition to some church activities. The procurement will occur under close cooperation between Stiftelsen Bymuseet in Bergen and it's insurance company as this is part of an insurance settlement.

The organ in the church was supplied by E. E. Walcker & Cie. in 1937, reusing the pipework from the church's previous organ, which was built in 1870 by Claus Jensen. This instrument was removed along with the gallery it stood in, and the Walcker organ was then set up in a room in the tower with sound openings toward the nave and playing console on the gallery beneath. It received 11 voices and two transmissions, electric tracture and both task charger and cone charger. After the war, the church was no longer in regular use. Therefore the organ was preserved in original condition and was in normal functional condition, until 2013 when there was humidity damage in connection with the extinguishing work after a fire.

The restoration will include a complete reconditioning following strict musicological guidelines. This involves the preservation of as many original parts of the organ as possible, either through reuse where possible and respectful repairs, and only in absolutely necessary circumstances replacement with the most accurate copies, or that the existing parts are cleaned and preserved in place, at the same time as newer, functional parts are placed around the original (applies to electrical components). A combination of different solution may also be assessed. Regardless of the chosen solution, the motive for preservation of original parts and technical documentation value should be safeguarded. The acoustic pattern shall be preserved unchanged. It is a requirement that after the restoration, the organ shall function well and problem free under all relevant climatic conditions.

The tenderers are asked to describe the solution proposal in the document named 'Løsningsbeskrivelse' More than 1 solution can be described. Any price implications for various proposals must, in such event, be stated clearly in the submitted tender form (more than one form can be submitted). The solutions shall be discussed during negotiations, in such a way that only 1 solution will be subject to final assessments. The selected solution description shall be approved by County Curator in Hordaland.

All works shall be documented for future use. Pictures shall be taken and work methods /solutions shall be documented continuously.

#### **II.1.5. CPV code(s)**

37311300 Musical organs

#### **II.1.6. Information about the Government Procurement Agreement (GPA)**

The procurement is covered by the Government Procurement Agreement: no

#### **II.2. Total value of the contract/lot**

##### **II.2.1. Total value of the contract/lot**

### **Section IV: Procedure**

---

#### **IV.1. Type of procedure**

##### **IV.1.1. Type of procedure**

Negotiated with a call for competition

#### **IV.2. Award criteria**

##### **IV.2.1. Award criteria**

The most economically advantageous tender in terms of

1. Solution description. Weighting 50
2. Price and guarantee. Weighting 50

##### **IV.2.2. Information about electronic auction**

An electronic auction has been used: no

### **IV.3. Administrative information**

#### **IV.3.1. File reference number attributed by the contracting authority**

#### **IV.3.2. Previous publication concerning this procedure**

##### **Contract notice**

Notice number in the OJ S: [2016/S 054-091086](#) of 17.3.2016
