Ireland – Transport systems consultancy services – MTFO, C-ITS and EMOS Technical Services Commission

OJ S 71/2026 13/04/2026

Contract or concession award notice – standard regime
Services

1. Buyer

1.1. Buyer

Official name: Transport Infrastructure Ireland (TII)

Email: Paul.Farrelly@tii.ie

Legal type of the buyer: Central government authority

Activity of the contracting authority: General public services

2. Procedure

2.1. Procedure

Title: MTFO, C-ITS and EMOS Technical Services Commission

Description: Stand alone Contract Award Notice for technical support services to assist in the management and enhancement of several key initiatives, including the M50 Traffic Flow Optimisation Project, the enhanced Motorway Operation Services (eMOS) programme, and the Network Intelligence Management System (NIMS). These services also encompass the development of business intelligence, data analytics, and other ITS-related projects. The eMOS programme serves as the overarching framework through which TII delivers a range of works and services aimed at ensuring the safe, efficient, and sustainable operation of Ireland's motorway network.

Procedure identifier: bc694916-0655-4649-aa98-91f4f85d3ae1

Internal identifier: TII372_Lot 3A_01

Type of procedure: Open

2.1.1. Purpose

Main nature of the contract: Services

Main classification (cpv): 71311200 Transport systems consultancy services

2.1.2. Place of performance

Country subdivision (NUTS): Dublin (IE061)

Country: Ireland

2.1.3. Value

Estimated value excluding VAT: 10 000 000,00 EUR

2.1.4. General information

Legal basis:

Directive 2014/24/EU

5. Lot

5.1. Lot: LOT-0001

Estimated value excluding VAT: 10 000 000,00 EUR

5.1.6. General information

Procurement Project fully or partially financed with EU Funds.

The procurement is covered by the Government Procurement Agreement (GPA): no

5.1.7. Strategic procurement

Aim of strategic procurement: Reduction of environmental impacts

Description: The procurement procedure has been designed to promote environmental sustainability, support relevant social objectives, and encourage innovation within Transport Infrastructure Ireland's (TII) motorway operations and Intelligent Transport Systems (ITS) programmes. Environmental Impact Reduction The technical support services being procured will directly contribute to reducing environmental impacts across the national motorway network. Through the M50 Traffic Flow Optimisation Project, the enhanced Motorway Operation Services (eMOS) programme, and the Network Intelligence Management System (NIMS), the supplier will help TII deploy and refine Intelligent Transport Systems that improve traffic flow, reduce congestion, and minimise stop#start driving. These improvements are known to lower fuel consumption and associated CO# emissions. The development of enhanced data analytics and business intelligence capabilities will also support evidence#based interventions that enhance network efficiency and promote more sustainable travel behaviour. Together, these activities help reduce the environmental footprint of motorway operations and support national climate#action commitments. Fulfilment of Social Objectives By improving the safety and operational performance of the motorway network, this procurement supports key social objectives, including public safety, accessibility, and service reliability for all road users. The eMOS programme provides the overarching framework for delivering safe and predictable motorway travel, reducing the likelihood and severity of incidents, and improving emergency response coordination. The technical services procured will enhance system resilience and ensure that critical transport infrastructure continues to support economic activity, social mobility, and community connectivity. Support for Innovation The scope of services includes the management and enhancement of ITS#related projects and the advancement of next#generation traffic management technologies. This incorporates innovative approaches such as advanced analytics, real#time data integration, and modern traffic optimisation tools. By investing in enhanced capability within business intelligence and

the ongoing evolution of NIMS, the procurement enables TII to adopt state-of-the-art solutions for motorway operations. These innovations will facilitate smarter decision-making, enable predictive traffic and asset management, and support the long-term modernisation of Ireland's strategic road network.

Approach to reducing environmental impacts: Other

Green Procurement Criteria: Other Green Public Procurement criteria

5.1.10. Award criteria

Criterion:

Type: Quality

Description: Quality at 90%

Category of award weight criterion: Weight (percentage, exact)

Award criterion number: 90

Criterion:

Type: Price

Description: Price at 10%

Category of award weight criterion: Weight (percentage, exact)

Award criterion number: 10

5.1.15. Techniques

Framework agreement:

Framework agreement, with reopening of competition
