Under the Digital Education Action Plan (2021-2027), which outlines the European Commission's vision for high-quality, inclusive and accessible digital education in Europe, and under Action 13 'Encourage women's participation in STEM' (science, technology, engineering, and mathematics), the European Commission expects the EIT and the KICs to equip 8 000 girls aged 14-18 with digital skills by the end of 2021 through a learning programme that engages girls in an EIT-branded digital learning platform.

The Girls Go Circular Project (www.eit-girls-gocircular.eu) will achieve this ambition and involve secondary school students in 8 EIT Regional Innovation Scheme (EIT RIS) Countries that will participate in a 1-day training on digital skills and the circular economy.

As the coordinating KIC of the Girls Go Circular Project, EIT RawMaterials is seeking a professional organisation or project consortium to render the following services:

- engage secondary schools from all the countries,
- train teachers and facilitators to guide girls through the online courses,
- support schoolteachers in delivering the learning programme,
- recruit teachers and students.

Section VI: Complementary information

VI.3. Additional information

1) The value information under II.1.7) and V.2.4) is incorrect and is based solely on the fact that the form requires one entry in each case. Pursuant to § 39 (6) Nos. 2 to 4 German Procurement Ordinance (Vergabeverordnung — VgV), the contracting authority is not obliged to publish individual details if their publication would be contrary to the public interest, would damage the legitimate business interests of a company or would hinder fair competition between undertakings. The total value of the procurement and the value of the contracts awarded are not disclosed because this would damage the legitimate business interests of the contractor. In addition, publication of the procurement or contract value would be contrary to

the public interest and would hinder fair competition between companies in future award procedures, as conclusions about tender contents and, therefore, competition would be possible from such information.

2) The most economical tender was determined, in accordance with § 127 (1) ARC solely on the basis of the quality of the tender concept to be submitted by the tenderers. The entry 'cost criterion' with a weighting: '0' under II.2.5) was made only because the form does not permit an entry according to which the most economical tender is determined only according to the best quality.
