Reference number: STF-23-6

II.1.2. Main CPV code

72200000 Software programming and consultancy services

II.1.3. Type of contract

Services

II.1.4. Short description

The contractor will develop a working concept based on the following criteria:

- Working with participating FOSS infrastructure projects to identify and make an inventory of known issues caused by under-maintenance, including but may not be limited to:

- Known bugs or other problems with the codebase that haven't been addressed due to lack of capacity
- Significant technical debt that is caused by lack of maintenance resources
- Complexity in the codebase that causes a barrier to long-term maintenance or a threat to the project's security posture
- Missing best practices or structures that could be implemented to enable long term secure maintenance practices.
- Develop a roadmap and a work plan to help the projects prioritize and address the known issues that have been identified.
- Provided additional capacity, knowledge and code contributions for the projects as needed through:
 - Providing re-engineering, re-coding, refactoring or removing code services;
 - Fixing known bugs;
 - as well as help implementing best practices or standards for future ease of maintenance, such as badge programs or certifications.
