Tenders or requests to participate must be submitted electronically via: <https://tarjouspalvelu.fi/fintraffic?id=451826&tpk=98efed74-48a5-4c04-9d43-98176763831a>

I.6. Main activity

Railway services

Section II: Object

II.1. Scope of the procurement

II.1.1. Title

Request for participation: Lielähti-Rauma/Pori ERTMS Signalling system

II.1.2. Main CPV code

34630000 Parts of railway or tramway locomotives or rolling stock; railways traffic-control equipment

II.1.3. Type of contract

Supplies

II.1.4. Short description

The procurement consists of ERTMS Signalling System in area Lielähti-Rauma/Pori in Finland. The scope of the procurement is described in the Annex "The Scope of the Procurement" .

II.1.5. Estimated total value

Value excluding VAT: 20 000 000,00 EUR

II.1.6. Information about lots

This contract is divided into lots: no

II.2. Description

II.2.2. Additional CPV code(s)

34632200 Electrical signalling equipment for railways, 48140000 Railway traffic control software package, 71311230 Railway engineering services, 72212140 Railway traffic control software development services, 34632000 Railways traffic-control equipment, 45234115 Railway signalling works, 34000000 Transport equipment and auxiliary products to transportation

II.2.3. Place of performance

NUTS code: FI Suomi / Finland

Main site or place of performance: Western Finland

II.2.4. Description of the procurement

Finland's current train control system is approaching the end of its life cycle. The service life of the system will expire around the end of the 2020s. For Finland, the next logical step is to move to a European railway traffic management system (ERTMS) and a modern radio based ETCS (European Train Control System).

The regulation also obliges to renew the system, as Finland, as an EU Member State, must update the systems to be compatible with European systems. The Trans-European Transport Network, TEN-T, must be equipped with ERTMS in order to guarantee interoperability. The new railway alignments also require a new type of train control, as stipulated by the EU. Finland has committed to the implementation of ERTMS on its national railway network. The ERTMS implementation is to be carried out by a national ERTMS program called Digirail, involving the Ministry of Transport and Communication, other Government agencies, and all identified stakeholder companies. Digirail is important part of the 12-year National Transport System Plan.

The first phase of the implementation plan is to be carried out on the line from Lielähti to Rauma and Pori, covering approx. 190 kilometres of track. This will be the first implementation of radio based ETCS on a commercial track in Finland and it is expected that construction will be carried out in 2025-2026, commissioning taking place Q4/2026.

The procurement consists of the ERTMS Signalling System in area Lielähti-Rauma and Pori in Finland.

II.2.5. Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6. Estimated value

II.2.7. Duration of the contract, framework agreement or dynamic purchasing system

Start: 01/01/2024 End: 31/12/2027

This contract is subject to renewal: yes

Description of renewals:

The contractual period of the agreement means contractual period for the supply agreement. The Main agreement will be valid until further notice. The Maintenance agreement is an option. Please see the agreement drafts.

II.2.9. Information about the limits on the number of candidates to be invited

Envisaged minimum number: 2 Maximum number: 4 Objective criteria for choosing the limited number of candidates:

The contracting authority has limited the number of candidates for the sake of predictability of time use and to moderate amount of candidate's workload.

II.2.10. Information about variants

Variants will be accepted: no

II.2.11. Information about options

Options: yes

Description of options:

The procurement includes options, such as maintenance services, which are described in the Annex "the Scope of the Procurement".
