#### 2.1. Procedure

Title: Suministro de reactivos, material de control y equipamiento principal o auxiliar, analítico y pre y post analítico, para la realización de determinaciones analíticas del laboratorio de análisis clínicos del Hospital Universitario de Sant Joan d'Alacant

Description: Mediante la celebración del presente contrato se pretende la adquisición de productos sanitarios para el diagnóstico in vitro definidos como cualquier producto sanitario que consista en un reactivo, calibrador, material de control, material fungible, instrumento, aparato, equipo o sistema, utilizado solo o en asociación con otros, principal o auxiliar, analítico y pre y post analítico, destinados a ser utilizado "in vitro" para el estudio de muestras procedentes del cuerpo humano, con el fin de proporcionar información relativa a un estado fisiológico o patológico, o relativo a una anomalía congénita o para determinar la seguridad y compatibilidad con receptores potenciales, o para supervisar medidas terapéuticas. Este material es necesario para realizar en el Hospital Universitario de Sant Joan D'Alacant las determinaciones analíticas de varios procedimientos de diagnóstico, procedentes de: 1. Asistencia especializada y Atención primaria 2. Hospitalización en régimen de internamiento 3. Apoyo a la atención primaria en el alta hospitalaria precoz y hospitalización a domicilio 4. Indicación o prescripción, y la realización, en su caso, de procedimientos diagnósticos y terapéuticos Las nuevas tendencias van encaminadas hacia laboratorios de 24 horas y de esto deriva la creación de Áreas de automatización o Laboratorio CORE, que permiten procesar un elevado número de determinaciones analíticas ofertadas en la cartera de Servicios, y de esta forma poder dar solución a las necesidades del Departamento de Salud de Alicante- Sant Joan d'Alacant y de aquellas Áreas para los que el Hospital y el laboratorio es Centro de Referencia. El objetivo de estas iniciativas es avanzar en un proceso de simplificación organizativa, trascendiendo de una organización basada en las estructuras físicas (espacios físicos e instalaciones tecnológicas) a una organización basada en los procesos. Este modelo organizativo genera beneficios para el conjunto del Sistema Sanitario Valenciano, no ya solo en términos de mejora de la eficiencia y ahorro económico, sino también derivados de una oferta asistencial más homogénea y accesible para la población, con mayores posibilidades de ser ampliada en el tiempo con técnicas de última generación. Adicionalmente, permite integrar y aprovechar en mayor medida el conocimiento científico y la

calidad de los resultados para dar una mejor respuesta a las necesidades clínicas de los pacientes. Asimismo, al amparo de lo establecido en el art. 124 de la Ley 9/2017 de Contratos del Sector Público (en adelante LCSP), el expediente de contratación cuenta con su correspondiente Pliego de Prescripciones Técnicas, en el que se contienen las especificaciones técnicas particulares que han de regir la realización de la citada prestación y definen sus calidades y condiciones. Este suministro no está sometido a procedimiento de contratación centralizada y su licitación queda fuera por tanto de la Central de Compras (Decreto 11/2020, de 24 de enero, del Consell, de regulación de la Central de Compras en el ámbito de la sanidad pública valenciana), según el Plan de Contratación 2025 publicado por la Consellería de Sanidad.
