Title: Intention notice - consultancy services for reducing emissions to air from petroleum activities in Nigeria and Mozambique

Description: The Norwegian Environment Agency intends to enter into a contract with Carbon Limits AS for consultancy services for the reduction of emissions to air from petroleum activities, with particular emphasis on methane in our partner country in the programme Energy for Development. The assignment is a part of Norway's cooperation with partner countries on improved management of energy resources and the development of efficient regulations for emission reduction. The services include, among other things: • Identification of emission sources and regulatory needs. • Methods for calculating and estimating emissions, including GHG factors • Development of emission accounts. Monitoring, reporting and verification. • Consultancy services for establishing effective regulating regimes for reducing flaring, methane emissions and other emissions from oil and gas activities. In connection with the competition held in 2024, the Norwegian Environment Agency received only one tender, from Carbon Limits AS. The tenderer will be assessed as the most appropriate cooperation partner based on initiated work processes in partner countries, documented competence and experience. A supplier exchange will lead to interruptions in ongoing processes, a significant risk of delays and disproportionate costs, and will weaken the efficiency and continuity of the assistance. Carbon Limits AS is, based on this, being the only service provider for the contract period in question. The planned contract will include work in the period 2026-2027, with an option for a 1+1 year extension.
