1. Buyer

1.1. Buyer

Official name: Attvin AS

Email: Bente-Kristin.Rodland@alesund.kommune.no

Legal type of the buyer: Body governed by public law

Activity of the contracting authority: General public services

2. Procedure

2.1. Procedure

Title: Procurement - Transport and treatment of hazardous building waste Attvin, 2026

Description: The contracting authority would like to use this procurement to enter into a framework agreement with one tenderer. The aim of the contract is to cover the contracting authority's need for transport and treatment of hazardous building waste, from Attvin to final treatment at a certified treatment facility, in accordance with the requirement specifications. The aim is also to ensure that hazardous waste is taken care of in such a way that it does not create pollution or damage to humans or animals, or danger to it, and to contribute to an appropriate and reliable system for handling hazardous waste, cf. The Waste Regulations chapter 11. The contract is for: Waste with phthalates (e.g. floor coverings), waste that contains bronched flame retardants, waste containing chlorinated paraffins and for the options waste that includes PUR foam insulation and pressure impregnated and creosoted wood.

Comments on the contract: Responsibility for the waste is to be taken over by a tenderer when the waste is charged in the tenderer's vehicles. The procurement is for the treatment of various types of hazardous building waste and building waste that cannot be handled together with normal household and commercial waste due to chemical, physical and/or biological qualities. Waste types included in this agreement are in accordance with the price form. Everything that is collected as hazardous waste shall be treated at a certified treatment facility. Emphasis is put on the fact that the hazardous waste in accordance with this agreement shall be directly to the final treatment facility and not the reception facility. Tenderers shall, thus, offer final treatment of the hazardous waste at one/several treatment facilities in accordance with requirements. Fractions other than what is stated may be included in this agreement. The volume of NOK shall not, nevertheless, exceed the maximum amount set for the contract. New waste types in the contract period: If new waste types are added in the contract period, it shall be possible for the customer to enter into this agreement if they do not make up a significant part of the contract. In such cases the same price calculations shall be used for new waste types as for other waste types in this contract. The contracting authority reserves the right, however, to hold a new competition for new waste types during the contract period. Options: Options in the contract are described in the point "options" in the requirement specification.

5.1. Lot: LOT-0000

Title: Procurement - Transport and treatment of hazardous building waste Attvin, 2026

Description: The contracting authority would like to use this procurement to enter into a framework agreement with one tenderer. The aim of the contract is to cover the contracting authority's need for transport and treatment of hazardous building waste, from Attvin to final treatment at a certified treatment facility, in accordance with the requirement specifications.

The aim is also to ensure that hazardous waste is taken care of in such a way that it does not create pollution or damage to humans or animals, or danger to it, and to contribute to an appropriate and reliable system for handling hazardous waste, cf. The Waste Regulations chapter 11. The contract is for: Waste with phthalates (e.g. floor coverings), waste that contains bronched flame retardants, waste containing chlorinated paraffins and for the options waste that includes PUR foam insulation and pressure impregnated and creosoted wood.

Comments on the contract: Responsibility for the waste is to be taken over by a tenderer when the waste is charged in the tenderer's vehicles. The procurement is for the treatment of various types of hazardous building waste and building waste that cannot be handled together with normal household and commercial waste due to chemical, physical and/or biological qualities. Waste types included in this agreement are in accordance with the price form.

Everything that is collected as hazardous waste shall be treated at a certified treatment facility. Emphasis is put on the fact that the hazardous waste in accordance with this agreement shall be directly to the final treatment facility and not the reception facility. Tenderers shall, thus, offer final treatment of the hazardous waste at one/several treatment facilities in accordance with requirements. Fractions other than what is stated may be included in this agreement. The volume of NOK shall not, nevertheless, exceed the maximum amount set for the contract. New waste types in the contract period: If new waste types are added in the contract period, it shall

be possible for the customer to enter into this agreement if they do not make up a significant part of the contract. In such cases the same price calculations shall be used for new waste types as for other waste types in this contract. The contracting authority reserves the right, however, to hold a new competition for new waste types during the contract period. Options: Options in the contract are described in the point "options" in the requirement specification. Internal identifier: 26/1642

5.1.1. Purpose

Main nature of the contract: Services

Main classification (cpv): 90520000 Radioactive-, toxic-, medical- and hazardous waste services

Additional classification (cpv): 90000000 Sewage, refuse, cleaning and environmental services , 90500000 Refuse and waste related services

Options:

Description of the options: The contracting authority requests tenders for the options described below. The customer decides whether the different options shall be taken up or not. The customer can trigger the options at any time during the agreement period. Option 1: Impregnated pressure and creosote treated wood: The contracting authority has a contract with Tafjord Kraftvarme AS (TKV) for the delivery of impregnated and creosote treated wood. Tenderers shall be able to offer an option for the transport and treatment of impregnated pressure and creosote treated wood that the contracting authority can use if: The agreement with TKV will end during this contract period. When there is an audit at TKV. The audit period is normally one month, in May and the reception facility at TKV is closed. In 2026 the audit period will be extra long with 3 months in the period June - August. A price shall be offered in the price form for the transport and treatment of: Pressure impregnation (CCA) Creosote impregnated wood Mixed impregnated & creosimpregnated wood Option 2: IFraction: PUR - foam insulation: A price shall be offered in the price form for the transport and treatment of: CFC/KFH The collection shall be agreed with the tenderer if needed. Prices for the options are to be included in the price form. The evaluation of the options is in the award criterion Price.

5.1.2. Place of performance

Country subdivision (NUTS): Møre og Romsdal (NO0A3)

Country: Norway

Additional information: Participants in the agreement: -Attvin Produksjon AS -Attvin Næring AS

5.1.3. Estimated duration

Duration: 2 Years

5.1.4. Renewal

Maximum renewals: 2

Other information about renewals: Renewal length is 12 months

5.1.5. Value

Estimated value excluding VAT: 5 500 000,00 NOK

Maximum value of the framework agreement: 7 000 000,00 NOK

5.1.6. General information

Procurement Project not financed with EU Funds.

The procurement is covered by the Government Procurement Agreement (GPA): yes

5.1.10. Award criteria

Criterion:

Type: Price

Name: Price

Description: Weighting: The award criteria is weighted 70%. The award criteria consists of three (3) sub-criteria: The sub-criteria Avfall from the price form will be weighted 70% of this award criteria. The sub-criteria Option 1: Impregnated pressure and creosote treated wood from the price form is weighted 25% of this award criteria. The sub-criteria Option 2: IFraction: PUR foam insulation from the price form is weighted 5% of this award criteria. Orientation: Tenderers shall fill in the attached price form in their cost calculations and submit as an annex to the tender in Excel format. All fields in the attached price form marked with yellow shall be completed. Missing the price fields can cause difficulties in assessing the tender and the tender can then be rejected. We have requested prices in accordance with volume, regardless of the size of the waste, as this can vary based on the waste management. The volume is not subject to collection, this can lead to rejection. All prices are excluding VAT, including all direct or indirect expenses and duties that could be incurred in connection with the delivery. Order fees and invoice fees are to be seen as expenses. The prices shall include all costs for the Customer who is included in this competition. Costs that the tenderer knows will be incurred, but that are not specifically stated in the tender, will be seen as included in the stated costs. Journeys: All travel expenses shall be included in the offered prices. Costs for the execution of the assignment, including, but not limited to, parts and materials/equipment that the tenderer shall provide, consumables, general costs (including administration and work management) central to the assignment, taxes, fees and profits, shall be included in the offered prices. Costs for post-sorting etc. shall be included in the unit prices. I.e. tenderers must include all foreseeable costs when completing the price form, even if not all cost elements and services are described in detail in the tender documentation. This applies, for example, to the tenderer's extra resource input at the start of the assignment. Evaluation: When assessing the price, a hybrid model with break point 1 will be used. The attached template for the evaluation model is attached. The best price for each sub-criteria will achieve the highest score (10) and other solutions will be awarded a point score according to the evaluation model. Scores achieved on each of the sub-criteria will be multiplied by interrelated weighting and added together. The tenderer's total points for this award criteria is weighted with the award criteria's weighting percentage.

Category of award weight criterion: Weight (percentage, exact)

Award criterion number: 70

Criterion:

Type: Quality

Name: Environment

Description: Weighting: The award criteria is weighted 30%. The award criteria consists of three (3) sub-criteria: The sub-criteria Avfall from the price form will be weighted 70% of this award criteria. The sub-criteria Option 1: Impregnated pressure and creosote treated wood from the price form is weighted 25% of this award criteria. The sub-criteria Option 2: IFraction: PUR foam insulation from the price form is weighted 5% of this award criteria. Orientation: Tenderers shall fill in the attached price form in their cost calculations and submit as an annex to the tender in Excel format. All fields in the attached price form marked with yellow shall be completed. Missing the price fields can cause difficulties in assessing the tender and the tender can then be rejected. We have requested prices in accordance with volume, regardless of the size of the waste, as this can vary based on the waste management. The volume is not subject to collection, this can lead to rejection. All prices are excluding VAT, including all direct or indirect expenses and duties that could be incurred in connection with the delivery. Order fees and invoice fees are to be seen as expenses. The prices shall include all costs for the Customer who is included in this competition. Costs that the tenderer knows will be incurred,

but that are not specifically stated in the tender, will be seen as included in the stated costs. Journeys: All travel expenses shall be included in the offered prices. Costs for the execution of the assignment, including, but not limited to, parts and materials/equipment that the tenderer shall provide, consumables, general costs (including administration and work management) central to the assignment, taxes, fees and profits, shall be included in the offered prices. Scores achieved on each of the sub-criteria will be multiplied by interrelated weighting and added together. The tenderer's total points for this award criteria is weighted with the award criteria's weighting percentage.

Category of award weight criterion: Weight (percentage, exact)

Award criterion number: 30

5.1.15. Techniques

Framework agreement:

Framework agreement, without reopening of competition

Information about the dynamic purchasing system:

No dynamic purchase system

5.1.16. Further information, mediation and review

Review organisation: Møre og Romsdal tingrett

Information about review deadlines: In accordance with the regulations.

6. Results

6.1. Result lot identifier: LOT-0000

Winner selection status: No winner was chosen and the competition is closed.

The reason why a winner was not chosen: Decision of the buyer, not following a tenderer's request to review the award, because of technical or procedural errors

6.1.4. Statistical information

Summary of the review requests the buyer received:

Number of complainants: 0

Received tenders or requests to participate:

Type of received submissions: Tenders

Number of tenders or requests to participate received: 2
