II.1.4. Short description

Le marché a pour objet des travaux de déboisement, d'essouchage et/ou rognage des souches en zones humides sur 7 sites Natura 2000 de la région Hauts-de-France.

Il a pour objectif:

- restauration de milieux ouverts envahis par les ligneux;
- la colonisation par les ligneux est une conséquence de l'assèchement des tourbières et de leur enrichissement trophique. Elle est accentuée par l'absence de gestion sur les sites, à l'abandon et se traduit par une fermeture des habitats qui se dégradent puis disparaissent. La suppression des ligneux est nécessaire pour restaurer des conditions de lumières optimales pour les habitats ciblés par le LIFE (tourbières de transition et tremblants, marais calcaires à Marisque et tourbières basses alcalines) ou encore pour limiter l'évapotranspiration qui renforce l'abaissement des niveaux d'eau.
