2.1. Procedure

Title: 78015_78031 RH KLM PAT Tissue processors - New notice

Description: The contracting authority invites tenderers to a competition for the procurement of tissue processors for Rikshospitalet, Department of Pathology, Unit for histology. The instrument system shall be fully automated from the tissue cassette is loaded in the instrument until it is ready for paraffin embedding. Reagent concept: The tender shall be based on one (1) of the following reagent concepts: use of the departments own reagents from third party suppliers, or use of pre-filled, supplier-specific reagent systems.

Procedure identifier: f4de5fcf-4e32-4299-a4ee-e74d6f069927

Internal identifier: 78015_78031

Type of procedure: Open

The procedure is accelerated: no

Main features of the procedure: The department currently has a total tissue processing volume of approx. 1,100 tissue cassettes per day, divided between several tissue processors with different protocol types and process times, including long term protocols with process time up to 24 hours. The department also expects an increased volume in the coming years. The procurement in this competition includes the replacement of two tissue processors with high workload, which cover parts of the department's tissue processing needs. The daily transmission volume of 700 standard tissue cassettes and 1-20 super mega cassettes for the instruments procured in this competition will be based. The instruments shall support a broad spectrum of protocols, including quick protocols, standard protocols, protocols specifically suitable for containing fat tissues and longer protocols with process time up to two days. The instruments shall be suitable for operator independent operation during nights and weekends. Furthermore, the system shall include two identical instruments that are run equal and parallel. The reason is that the department needs robustness and redundancy as the patient material provided on these instruments is often irreplaceable material. In addition an option shall be offered for tissue processing capacity that covers the remaining capacity need equivalent to a minimum of 600 standard cassettes for operator independent overnight driving.
