2. Procedure

2.1. Procedure

Title: RFI/Market survey - procurement of level meters for waste containers and containers.

Description: Oslo municipality, c/o the Agency for Waste and Recycling, hereafter called REG, invites tenderers to a market survey (RFI) in connection with the purchase of level meters in waste containers and containers. Level meters shall be procured and installed, primarily in surface containers and buried systems for cardboard and paper, but we also want to be able to use level meters in wheeled containers. Data from level meters shall be used for needs based emptying and route optimisation. Another relevant area of use for level meters or equivalent container mounted sensors is to be able to register the position and emptying as an alternative to RFID and vehicle mounted reading equipment. In addition we would like to figure out how data on the position of each container can contribute to "the right container being in the right place". Furthermore, we want access to route optimisation tools where data from the level meters are continually updated and used to optimise routes for collection. The value of the procurement is estimated to be approx. For the sake of clarity mention that the stated amount limit is an estimate and does not obligate REG beyond the uncertainty in this
