

Spain-Madrid: Services related to the oil and gas industry
OJ S 118/2020 19/06/2020
Contract notice – utilities
Services

Legal Basis:

Directive 2014/25/EU

Section I: Contracting entity

I.1. Name and addresses

Official name: Enagas Transporte, S. A. U.
Postal address: Paseo de los Olmos, 19
Town: Madrid
NUTS code: ES España
Postal code: 28005
Country: Spain
Contact person: Roberto de la Fuente González
E-mail: rdelafuente@enagas.es
Internet address(es):
Main address: www.enagas.es

I.3. Communication

Access to the procurement documents is restricted. Further information can be obtained at:
<https://enagas.bravosolution.com/web/login.html>
Additional information can be obtained from the abovementioned address
Tenders or requests to participate must be submitted to the abovementioned address

I.6. Main activity

Production, transport and distribution of gas and heat

Section II: Object

II.1. Scope of the procurement

II.1.1. Title

Jack Up MODU and Well Plug and Abandonment Integrated Services for Castor UGS
(Castellón-Spain)

II.1.2. Main CPV code

76000000 Services related to the oil and gas industry

II.1.3. Type of contract

Services

II.1.4. Short description

Jack up MODU and well plug and abandonment integrated services for Castor UGS (Castellón-Spain).

II.1.5. Estimated total value

II.1.6. Information about lots

This contract is divided into lots: no

II.2. Description

II.2.3. Place of performance

NUTS code: ES522 Castellón/Castelló

Main site or place of performance: Castor underground gas storage.

II.2.4. Description of the procurement

The Castor project was the development of an underground gas storage facility on the depleted oilfield of Amposta, located offshore in the East of Spain. (Mediterranean Sea 22 km from the coast).

The newly built underground gas storage facilities consist of a wellhead platform bridge-linked to the process and living quarters platform, a subsea pipeline and an onshore operations plant. Recently, the decision to plug and abandon the wells is already taken by the Spanish Government. Consequently, a permanent abandonment of the thirteen Castor wells shall be accomplished, by using the newest technologies backed by a proven track record and more efficient work platforms.

Hence, it shall be required a Jack-Up MODU in order to enable secure well plug and abandonment operations and the awarding of Well Plug and abandonment integrated services. A unique tender will be issued to cover both scope of works although the award could be the award can be for both scopes jointly or independently.

It will be mandatory that the Jack Up MODU has a EU acceptable safety case, and ideally has worked within the EU recently

The jack-up should be suitable for:

- water depth capability – minimum 60 m. Also, the rig must be able to elevate the drillfloor high enough above the platform to be able to skid to all slots. (c.105 m based on the original Castor wells);
- hookload – It would a minimum of 250 klbs (113 MT), with a worst case overpull of 350 klbs (160 MT);
- POB – 100 beds minimum for efficient operations;
- drilling cantilever skidding envelope – rig must be able to skid to +/-19 m beyond the transom;
- fluid storage capability –2 000 bbls (300 m³) of drilling fluid.

Restriction of fluids dropped into the reservoir is a major constraint as it might require to handle a vast volume of fluids during well clean-up and cementing operations.

The well plug and abandonment integrated services shall carry out all the services and equipment required in to permanently abandon the 13 Castor wells by using the newest technologies backed by a proven track record, and more efficient work platforms.

The integrated services will include, besides the integrated well management services, the bidder awarded will be responsible for all specialized services and will provide response in terms of equipment and operational support to deal with all the possible contingencies identified in the detailed engineering phase. The jack up contract will be handle as part of the integrated services.

The integrated company shall coordinate the different disciplines involved in the plug and abandonment operations in a safe and efficient manner and integrate all operational programs for each discipline in the final execution program.

II.2.5. Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6. Estimated value

II.2.7. Duration of the contract, framework agreement or dynamic purchasing system

Duration in months: 6

This contract is subject to renewal: no

II.2.10. Information about variants

Variants will be accepted: no

II.2.11. Information about options

Options: no
