#### **5.1.10. Award criteria**

**Criterion:**

Type: Price

Name: Total Cost of Ownership (Price)

Description: Price is evaluated using an evaluation key, calculated on the basis of the tenderer's offered price as set out in Volume 3 – TCO Reply Form. The evaluation key is a technical measure used to compare prices on a common scale, where a lower score reflects a lower total cost. The evaluation key is calculated in the Excel sheet by dividing the total evaluation price by 37,000. Points are awarded on a scale from 0 to 30 points. Tenders with lower evaluation key scores receive more points, while higher scores receive fewer points. Between the defined thresholds, points are calculated using linear interpolation. For further description and for adjustment models see ITT section 5.1.1.

Category of award weight criterion: Weight (percentage, exact)

Award criterion number: 70

**Criterion:**

Type: Quality

Name: Answer to Questions (Quality)

Description: This sub-criterion is evaluated based on the responses provided by the Bidder to the Evaluation Criteria outlined in the document "Volume 2 – Statement of Requirements". The sub-criterion "Answer to Evaluation Criteria (Quality)" has been further divided into four (4) categories, referred to as part-criteria, each of which is assigned a specific weight as detailed in Table 2 above. Within each category, there are multiple evaluation criteria, each with an individual weight reflecting its relative importance. The weight of the part-criteria and evaluation criteria is listed in the Detailed Scoring Sheet document. Each evaluation criterion will be assessed by the Customer and scored on a scale from 0 to 5, where 0 represents the lowest score and 5 represents the highest, based on the scoring matrix provided in Table 3. The score for each evaluation criterion will then be weighted in accordance with its assigned weight to calculate the overall point score. The maximum total score for all weighted evaluation criteria within this sub-criterion is 30, which corresponds to the total weight of the sub-criterion 'Answer to Evaluation Criteria (Quality)'. A total score of 30 represents the highest and most desirable outcome.

Category of award weight criterion: Weight (percentage, exact)
