2. Procedure

2.1. Procedure

Title: Emission reduction maintenance dredging operations Rotterdam

Description: To make dredging operations more sustainable, HbR and RWS intend to jointly tender Lot 3 as a frontrunner project. The ambitions for this lot focus on emission reduction in dredging operations, with CO₂ eq., NO_x, and PM₁₀ (greenhouse gases, nitrogen oxides, and particulate matter, respectively) serving as key areas of focus, in accordance with the SEB covenant. At present, no medium-sized trailing suction hopper dredger is available that can operate continuously on Renewable Fuels of Non-Biological Origin (RFNBOs) or Renewable Electricity (RE). The frontrunner project aims to stimulate the development of such equipment and deploy it within a multi-year contract, with a significant application of RFNBO/RE.
