### 5.1. Lot: LOT-0002

Title: Support for inequality in ND: non-linear AI assisted models

Description: In Lot 2 JRC will ask for support on modelling inequality bridging micro heterogeneity and macro dynamics to reflect how shocks propagate unevenly. Support will be requested for variable data coverage, missing values, measurement errors, and differing data frequencies, requiring support for robust imputation and harmonization methods. Support on advanced estimation techniques applied to inequality will be also required for one or more of the following: pseudovariables models, distributional VARs, nonlinear econometric models, quantile regressions, mixed-effects models, and Bayesian nonparametric modelling, all capturing inequality.
