II.1.4. Information about framework agreement

II.1.5. Short description of the contract or purchase(s)

The municipalities in the procurement cooperation, Dovre, Lesja, Lom, Sel, Skjåk and Vågå municipalities, intend to enter into a contract for the procurement of tele traffic and the accompanying services. The aim of the contract is to cover the municipalities' ongoing need for stable telecommunication systems with an experience of top quality, stability and user friendliness.

The municipalities currently have traditional call contracts for landlines and mobiles and have in recent years phased in Telenor's InContact system. The system requested in this competition shall replace the current InContact system without a need for investments in new licences or servers.

The current telephony platform consists of a mix of mobile, landlines on ISDN and analogue. The system functions adequately and the starting point is that we do not want to change the portfolio as regards the current situation. This is justified by the municipalities not currently having the resources to undertake other changes than what is absolutely necessary for a change of service provider.

The municipalities have recently started to use MS Lync. The service provider must therefore be able to provide the necessary integration with Lync.
