2. Procedure

2.1. Procedure

Title: Market Consultation Access Control Sites and Telecom cabinets

Description: We need a managed solution for access to our remote locations and Telecom cabinets. These locations need battery-free electronic locks, where the 'key' should deliver the power for the lock, as the lock cannot always be powered externally. Keys will be handed out to personnel on their name, so there is traceability of who was where and when. The questions included in this Market consultation are intended solely to obtain insight into market capabilities, common practices, and potential solution directions. The information provided by suppliers will be used for exploratory and preparatory purposes only.
