

Denmark-Fredericia: IT services: consulting, software development, Internet and support

OJ S 102/2023 30/05/2023

Contract notice – utilities

Services

Legal Basis:

Directive 2014/25/EU

Section I: Contracting entity

I.1. Name and addresses

Official name: Energinet Systemansvar A/S

National registration number: 39 31 49 59

Postal address: Tonne Kjærsvej 65

Town: Fredericia

NUTS code: DK032 Sydjylland

Postal code: 7000

Country: Denmark

Contact person: K

E-mail: procurement@energinet.dk

Telephone: +45 70102244

Internet address(es):

Main address: <https://eu.eu-supply.com/ctm/supplier/publictenders?B=ENERGINET>

Address of the buyer profile: <https://eu.eu-supply.com/ctm/Company/CompanyInformation/Index/228008>

I.3. Communication

The procurement documents are available for unrestricted and full direct access, free of charge, at: http://eu.eu-supply.com/app/rfq/rwentrance_s.asp?PID=368959&B=ENERGINET

Additional information can be obtained from the abovementioned address

Tenders or requests to participate must be submitted electronically via: http://eu.eu-supply.com/app/rfq/rwentrance_s.asp?PID=368959&B=ENERGINET

Tenders or requests to participate must be submitted to the abovementioned address

I.6. Main activity

Electricity

Section II: Object

II.1. Scope of the procurement

II.1.1. Title

Procurement of Electricity Market Modelling Software

Reference number: 23/06793

II.1.2. Main CPV code

72000000 IT services: consulting, software development, Internet and support

II.1.3. Type of contract

Services

II.1.4. Short description

The Contracting Authority wants to purchase Electricity Market Modelling Software. Energinet is relying on electricity market forecasts as the foundation for any analysis, business case, electricity adequacy, budgeting, and other studies. Making qualified guesses on future electricity prices, emissions, constraints, and market dynamics through simulations is therefore of great importance for Energinet. Energinet does this through market models that can simulate a wide range of possible future European energy systems (electricity, heat, and hydrogen) on an hourly basis. The needs for Energinet include a State-of-the-art electricity market model with the ability to handle sector coupling, i.e., gas, hydrogen, and heat. State-of-the-art is defined by market models able to handle complex international studies, such as ERAA22 and TYNDP22, while also having capabilities to simulate hydro power through water value calculation algorithms.

II.1.5. Estimated total value

II.1.6. Information about lots

This contract is divided into lots: no

II.2. Description

II.2.2. Additional CPV code(s)

72212000 Programming services of application software, 72212900 Miscellaneous software development services and computer systems

II.2.3. Place of performance

NUTS code: DK Danmark

Main site or place of performance: Denmark

II.2.4. Description of the procurement

The Contracting Authority wants to purchase Electricity Market Modelling Software. Energinet is relying on electricity market forecasts as the foundation for any analysis, business case, electricity adequacy, budgeting, and other studies. Making qualified guesses on future electricity prices, emissions, constraints, and market dynamics through simulations is therefore of great importance for Energinet.

Energinet does this through market models, that can simulate a wide range of possible future European energy systems (electricity, heat, and hydrogen) on an hourly basis. The needs for Energinet include a State-of-the-art electricity market model with the ability to handle sector coupling, i.e., gas, hydrogen, and heat. State-of-the-art is defined by market models able to handle complex international studies, such as ERAA22 and TYNDP22, while also having capabilities to simulate hydro power through water value calculation algorithms.

As Energinet will have users using the model on a day-to-day basis as well as users with more moderate needs, a flexible user access structure is needed. The wide range of user types also demands for an intuitive and logical Graphical User Interface (GUI) so that users quickly can get familiar with the model and themselves input data, run simulations, and access results. Results from the market model should be a wide array of detailed data relevant to the energy system, e.g., flows, prices generation, emissions, adequacy indicators, water values.

The model needs to be suitable for implementation and running on private cloud (or on-premises) solutions. The underlying data and databases will be available for Energinet users only. Energinet should be able to backup, store and restore databases up to 10 years back in time – meaning that the supplier must provide solutions so that this can be achieved. After end of contract a view-only mode should be available for Energinet, so that any archived databases can be restored with all input- and output data.

For further details concerning the purchase, reference is made to the Tender Documents.

II.2.5. Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6. Estimated value

Value excluding VAT: 25 000 000,00 DKK

II.2.7. Duration of the contract, framework agreement or dynamic purchasing system

Duration in months: 240

This contract is subject to renewal: no

II.2.9. Information about the limits on the number of candidates to be invited

Envisaged number of candidates: 3
Objective criteria for choosing the limited number of candidates:

If more than 3 applicants fulfill the minimum requirements, cf. section III, the Contracting Authority will prequalify the 3 applicants who are evaluated as most qualified for the specific tendered assignment. Only these applicants will be invited to submit a tender. The selection of the applicants will be based on the relevance of the submitted references, cf. the scope stated in section II.2.4, and the extent to which the references overall demonstrate comprehensive experience with deliveries comparable to the tendered assignment regarding solution, complexity and scope, especially concerning:

- The model has been used in ENTSO-E projects such as Ten Year Network Development Plan, European Resource Adequacy Assessment (previously Midterm Adequacy Forecast) and Seasonal Outlooks, either by ENTSO-E or by a TSO. This can be both as the published tool or as a benchmarking tool used in the alignment process.
- The model is used by European TSOs, with more relevance given to TSOs located in similar part of the European system as Denmark (i.e. Northern Europe).

II.2.10. Information about variants

Variants will be accepted: no

II.2.11. Information about options

Options: no

II.2.13. Information about European Union funds

The procurement is related to a project and/or programme financed by European Union funds:
no

II.2.14. Additional information

Please note that this is a negotiated procedure. With the exception of mandatory parts, the Tender Documents may as a result undergo changes as part of the negotiation process.

Section III: Legal, economic, financial and technical information

III.1. Conditions for participation

III.1.2. Economic and financial standing

List and brief description of selection criteria:

The applicant must confirm the economic ability in the ESPD part IV.B: "Economic and financial standing" with information from the latest annual report regarding the following economic indicators:

1. Equity (total equity incl. share capital, reserves, revaluation, retained earning etc.)
2. Equity ratio (equity/total assets). This must be stated with two decimals.

If the applicant is relying on the capacities of one or more other entities (e.g. a parent or sister company or a subcontractor) or the applicant is a group of economic operators (e.g. a consortium) the information for the ESPD part IV.B must also be given in a separate ESPD from each of these entities, cf. section VI.3 "Additional information". It is the sole responsibility of the applicant to secure that the minimum level(s) of standards required are reached on the basis of consolidation when the applicant is relying on the capacity of other entities or when the applicant is a group of economic operators (e.g. a consortium).

Minimum level(s) of standards possibly required:

Concerning 1: Equity from the latest annual report must, at the time of prequalification, be at least DKK 750.000.

Concerning 2: Equity ratio from the latest annual report must, at the time of prequalification, be at least 20 pct. If the equity ratio is between 15 pct. and 20 pct. the applicant can qualify if Equity exceeds DKK 25 mio.

III.1.3. Technical and professional ability

List and brief description of selection criteria:

The applicant can include the up to 3 most comparable and relevant references undertaken in the past three (3) years as part of the application. The references must be stated in the ESPD part IV.C: "Technical and professional ability". Undertaken in the past three (3) years implies that the reference must not have been completed prior to the date reached when counting 3 years backwards from the submission date for prequalification. References older than this will not be taken into consideration. References which have not yet been fully completed can be included as part of the application, but if this is the case, the applicant must describe the parts which have not yet been delivered, and this may affect the evaluation of the applicant, cf. section II.2.9.

The references should include:

- A specific description of the work performed for each reference, including:
 - o The ENTSO-E project(s) where the model has contributed in and by which entity have used the model.
 - o The European TSOs using the model at current time.
- Contract value (if possible)
- Contact information for the entity in question (including contact person)
- Date of initiation and final delivery (day, month, year)

Any ambiguities and/or incomprehensibilities concerning the above information may have a negative effect on the selection of candidates, cf. section II.2.9. Please note the "description" box can contain more text than is visible. I.e. it is possible to copy paste text into the box.

If the applicant is relying on the references of one or more other entities (e.g. a parent or sister company or a subcontractor) or the applicant is a group of economic operators (e.g. a consortium) the information for the ESPD part IV.C must also be given in a separate ESPD from each of these entities.

The number of references should not surpass a maximum of the 3 most comparable and relevant references. If the applicant is relying on the capacity of one or more other entities (e.g. a parent or sister company or a subcontractor) or the applicant is a group of economic operators (e.g. a consortium) the maximum number of references to be submitted must still be respected and cannot exceed 3 when combined. If more than 3 references are submitted, the Contracting Authority will only consider the 3 most recent references determined by date of final delivery (in this case not yet finished references will not be included).

III.1.4. Objective rules and criteria for participation

List and brief description of rules and criteria:

The applicant must submit a completed version of the ESPD.

Applicants may not be subject to the mandatory grounds for exclusion, cf. the Danish Public Procurement Act (udbudsloven) Section 134a, 135 (1-3) and 136.

Please see section VI.3 "Additional information" for further information regarding the ESPD.

The application must be submitted through EU-Supply, cf. link in section I.1 in this notification.

Applications not submitted via EU-Supply or received after the deadline will not be accepted.

The Contracting Authority reserves the right to request the applicant to supplement, specify or complete the information submitted.

III.1.6. Deposits and guarantees required

The information is stated in the Tender Documents.

III.1.7. Main financing conditions and payment arrangements and/or reference to the relevant provisions governing them

The information is stated in the Tender Documents.

III.1.8. Legal form to be taken by the group of economic operators to whom the contract is to be awarded

No special legal form is required.

If the agreements are awarded to a group of economic operators (e.g. a consortium) the participants are required to undertake joint and several liabilities and to appoint one economic operator to represent the group.

III.2. Conditions related to the contract

III.2.2. Contract performance conditions

The information is stated in the Tender Documents.

Section IV: Procedure

IV.1. Description

IV.1.1. Type of procedure

Negotiated procedure with prior call for competition

IV.1.3. Information about a framework agreement or a dynamic purchasing system

IV.1.4. Information about reduction of the number of solutions or tenders during negotiation or dialogue

Recourse to staged procedure to gradually reduce the number of solutions to be discussed or tenders to be negotiated

IV.1.8. Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: yes

IV.2. Administrative information

IV.2.2. Time limit for receipt of tenders or requests to participate

Date: 15/06/2023 Local time: 16:00

IV.2.3. Estimated date of dispatch of invitations to tender or to participate to selected candidates

IV.2.4. Languages in which tenders or requests to participate may be submitted

English

IV.2.6. Minimum time frame during which the tenderer must maintain the tender

Duration in months: 6 (from the date stated for receipt of tender)

Section VI: Complementary information

VI.1. Information about recurrence

This is a recurrent procurement: no

VI.2. Information about electronic workflows

Electronic invoicing will be accepted

Electronic payment will be used

VI.3. Additional information

The applicant must submit a completed ESPD to apply for prequalification for this tender procedure. The ESPD for this tender can be found via EU-supply. The ESPD must be completed in EU-Supply and submitted via "My Response". A guide to the ESPD can be found on the webpage of the Competition and Consumer Authority (www.kfst.dk) in Danish (the Contracting Authority is not responsible for the content of the guide).

Please note:

- An applicant participating on its own, but relying on the capacities of one or more other entities (e.g. a parent or sister company or a subcontractor), must ensure that the application includes the applicant's own ESPD together with a separate ESPD from each of the entities it relies on with a completed part II: "Information concerning the economic operator" and part III: "Exclusion grounds" of the ESPD as well as the relevant information regarding part IV: "Selection criteria" and part V: "Reduction of the number of qualified candidates". The ESPD from each of the entities should be duly filled and signed by the entities concerned.

Further where an applicant wants to rely on the capacities of other entities, it shall prove to the contracting authority that it will have at its disposal the resources necessary, for example, by producing a commitment by those entities to that effect, which must be submitted as part of the final documentation.

- Where groups of economic operators, including temporary associations, participate together in the procurement procedure, a complete separate ESPD for each of the participating economic operators must be submitted.

Further the final documentation must include a signed declaration by all parties of the group of economic operators (joint venture, consortium or other) stating that all economic operators assume joint and several liabilities towards the Contracting Authority for the performance of the contract as a whole.

VI.4. Procedures for review

VI.4.1. Review body

Official name: Klagenævntet for Udbud

Postal address: Nævnenes Hus, Toldboden 2

Town: Viborg

Postal code: 8800

Country: Denmark

E-mail: klfu@naevneshus.dk

Telephone: +45 72405708

Internet address: <https://naevneneshus.dk/start-din-klage/klagenaevnet-for-udbud/>

VI.4.3. Review procedure

Precise information on deadline(s) for review procedures:

Complaints regarding a candidate not being pre-qualified must be filed with The Complaints Board for Public Procurement within 20 calendar days starting the day after the contracting authority has sent notification to the candidates involved, provided that the notification includes a short account of the relevant reasons for the decision.

Other complaints must be filed with The Complaints Board for Public Procurement within:

1. 45 calendar days after the contracting authority has published a contract award notice in the Official Journal of the European Union (with effect from the day following the publication date);
2. 30 calendar days starting the day after the contracting authority has informed the tenderers in question, that the contracting authority has entered into a contract based on a framework agreement through reopening of competition or a dynamic purchasing system, provided that the notification includes a short account of the relevant reasons for the decision.
3. 6 months starting the day after the contracting authority has sent notification to the candidates/tenderers involved that the contracting authority has entered into the framework agreement, provided that the notification included a short account of the relevant reasons for the decision.

VI.4.4. Service from which information about the review procedure may be obtained

Official name: Konkurrence- og Forbrugerstyrelsen

Postal address: Carl Jacobsen Vej 35

Town: Valby

Postal code: 2500

Country: Denmark

E-mail: kfst@kfst.dk

Telephone: +45 41715000

Internet address: <http://www.kfst.dk>

VI.5. Date of dispatch of this notice

25/05/2023
