[\http://vanskelighetsgrad. With] • Construction of water and sewage installations in residential areas with laying of water pipelines and manhole building, and; • Blasting work connected to the establishment of Water and Sewage ditches, close to existing buildings, infrastructure and private properties. See the tender documentation point 4.1.3 . Documentation requirements: An overview of the construction and construction work that the tenderer has carried out in the last five years, together with testimonials for satisfactory execution of the most important work. If necessary to ensure sufficient competition, the contracting authority can also accept documentation for relevant building and construction work carried out more than five years ago.

Criterion: Other economic or financial requirements

Description of selection criterion: Tenderers shall have a quality assurance system that fulfils the relevant quality assurance standard. See the tender documentation point 4.1.3 .

Documentation requirements: Copy of a valid certificate issued by independent bodies, for example ISO 9001 or equivalent. The quality assurance standard shall be based on relevant European standard series, which are certified by accredited bodies. The contracting authority will accept other equivalent certificates issued by bodies in other EEA countries. • The contracting authority will also accept other documentation for equivalent quality assurance measures if the tenderer is unable to obtain such certificates by the deadline and this is not due to the tenderer himself. It is a prerequisite that the tenderer documents that these measures correspond to the requested quality assurance standards.

Criterion: Other economic or financial requirements

Description of selection criterion: Tenderers shall have an environmental management system that fulfils the relevant environmental management standard. See the tender documentation point 4.1.3 . Documentation requirements: Copy of a valid certificate issued by independent bodies, for example ISO 14001 or equivalent. Refer to the EU Scheme for Environmental Management and Environmental Audits (EMAS), other recognised environmental management systems in Regulation (EF) no. 1221/2009 article 45 or other environmental management standards based on relevant European or international standards from accredited bodies. The contracting authority will accept equivalent certificates issued by bodies in other EEA countries. • The contracting authority will also accept other documentation for equivalent environmental assurance measures if the tenderer is unable to obtain such certificates by the deadline and this is not due to the tenderer himself. It is a prerequisite that the tenderer documents that these measures correspond to the requested environmental management systems or standards.

Criterion: Other economic or financial requirements

Description of selection criterion: • Tenderers shall be suitable to fulfil contract requirements for due diligence assessments for responsible businesses within 3 months of the contract being signed. [\http://kontraktsignering. With] With [\http://kontraktsignering. This means that the Tenderer has implemented measures and systems that are used in the Tenderer's work to safeguard basic human rights and decent working conditions, as well as prevent environmental degradation and corruption. See the tender documentation point 4.1.4.

Documentation requirements: A description of the tenderer's systems for working with due diligence assessments in accordance with the UN's guiding principles for business and human rights (UNGP) and OECD's guidelines for multinational companies. The documentation shall

include: • Formal policy/guidelines that cover an obligation to comply with the requirements of responsible businesses. • Formal policy/guidelines for accountability for sub-suppliers/the supplier chain, (Supplier Code of Conduct). This shall only be provided if sub-suppliers are used. • Descriptions of the tenderer's processes and routines for how the company works with due diligence assessments. • Description of how the tenderer will obtain and maintain an overview of the country of origin and production locations for the products that the tenderer offers. This shall only be delivered if the procurement includes goods.

5.1.10. Award criteria

Criterion:

Type: Price

Description: Price: The price evaluation will only be based on the offered total price, as stated in the tenderer's summed quantity description in Annex 1.2.1 - Quantity Description and hourly rates. The total price is calculated as the sum of all priced items in the quantity description, excluding VAT. The offered hourly rates will not be emphasised or assessed in the tender evaluation.

Category of award weight criterion: Weight (percentage, exact)

Award criterion number: 60

Criterion:

Type: Quality

Description: Assignment comprehension: • When evaluated, the contracting authority will emphasise how the tenderer's systems take care of and solve the different challenges in the project. At the same time emphasis will be put on how the tenderer identifies and solves any further challenges that are not explicitly mentioned in the description. • When evaluating, the contracting authority will emphasise how the progress plan ensures proper progress as regards HSE and quality in the project. At the same time emphasis will be put on how the tenderer's manpower and capacity ensure effective management of the contract work, both for planned activities and unforeseen conditions. The contracting authority has identified the following challenges: • Traffic management and mass handling in residential areas. • Site activity near a nursery in an area with bad access/narrow road width • Blasting and pigging of rock along the existing high and low voltage routes, as well as with overflow cables. • Execution of an emission free system in one area with access to small electricity • Handling of the local environment as regards neighbour contact, site noise, site dust, vibrations and vibrations.

Category of award weight criterion: Weight (percentage, exact)

Award criterion number: 40

Criterion:

Type: Quality

Description: 5.2.3 Exceptions from weighting the environment The contracting authority has assessed the use of climate and environmental considerations in light of the utilities regulations §7-9 in this procurement. The main rule in accordance with §7-9 second paragraph is that climate and environmental considerations shall be weighted with a minimum of 30 percent in the award criteria. Pursuant to §7-9 fourth paragraph, however, the award criteria can be replaced with climate and environmental requirements in the requirement specification, if it is clear that this gives a better climate and environmental effect, and this is justified in the procurement documents. The contracting authority has made a concrete assessment of the nature and execution of the relevant procurement, and it is assumed that the climate and environmental impact is mainly related to how the construction work and the accompanying transport are actually carried out, including the use of machines and vehicles. Furthermore, it is considered that binding minimum requirements in the requirement specifications provide a

more predictable and safe reduction of emissions than the use of award criteria alone, as the requirements apply during the entire contract, independent of the tender evaluation. Oslo municipality's standard climate and environmental requirements for building and construction procurements have form the basis for the contract. In accordance with these requirements, there are minimum requirements regarding emission free execution of the construction work, including that all work at the building and construction site shall be carried out emission free. The following applies to the last transport stretch/cargo mile for mass transport and other transport: • Tenderers are obliged to use vehicles that are either emission free or biogas based in the execution of the contract. All relevant environmental performance is therefore regulated as an absolute minimum requirement, which safeguards climate and environmental considerations in the best possible way. The contracting authority will therefore not evaluate the climate/environment criteria.
