2. Procedure

2.1. Procedure

Title: Execution services for Hovudvassleidning Krakk – Knapphus

Description: announcement of the coming competition. This competition will be published 1 June. The tender deadline will be short. There is a site inspection on route 02.06.2026, 12:00. Vindafjord municipality shall construct a new water and sewage service between Skjold and Vats. Parts of this have now been completed for a stretch between Solheim and Krakk. A facility of approx. 1.2 km of PE 315 mm leased from Krakk to Knapphus shall now be constructed. Approx. 750 m of these are on land. Resterande in the lake. A new water and sewage system has been engineered for drinking water with manholes and drainage. The bumps and amounts are being developed by Cowi Haugesund. The initiative is construction searches. Approx. 450 m of PE SESU 315 mm shall be loaded in Røyrvatnet. This is seen as a demanding case for both experience and competence. The edge zone around the lake is swampy with sore abilities. The Botn conditions are lause and have very good ability. It can be deceiving to have boats set out on the lake due to the age-appropriate lending's waterside. Parts of the lake are edifice in the beach. May have to use cranes to launch boats with. Excavating and laying hire can be degrading near and in the edge zone due to folly matter and bad ability. May need to consider long excavators or other permits here. New leased and kummar shall be put on frost free djupna. Water and sewage norm and water and sewage norm for Vindafjord debt for the assignment. At least 80% of the work shall be carried out by skilled workers. Ground surveys and car laying of Røyrvatnet have been carried out. It sights breeding in the northern part of the lake. The contracting route must therefore be altered slightly. Noko, which means that the welded at bend 3 on the leased section and the leased service must be accurately loaded in routes. Gps measurements are required when laying the leidninga in the lake. There may be mountains in part of the route. Then it can host blasting /chiselling. In pricing the tenders, the contractor must take a high so that this can happen. There are adjustable postage for blasting and chiselling. The contracting authority shall place the contract in the tractor road, box and border. There will be contact with drainage that lies in roads and ekre. The contractor must skate and take care of in a good way. There are adjustable items for this. Work hosted in development class 3 water supply and sewage installations. The work will require a certified enterprise classification. Central approval or equivalent must be enclosed with the tender. The work required experience with laying pe water treatment in the sea or lake. Documentation must be enclosed from projects on laying of

PE 315 mm or greater during the last 5 years. The road down from the E134 and down into the yard shall be set to stand and asphalted. The downward road shall be set and gravelasted up. The ekrer shall be set to stand after the work has ended. The measure require signage on both the E134 and county road 46. It hosts the contractor's job to apply and arrange this. The contracting authority has made a contract with the founding authorities. Contractors must familiarise themselves with the desse and conditions to them in their work and completion. The work will be carried out during the growth season. But the farmer must have the opportunity to silo balls and anna on the real estate. The contractor must facilitate this for. Work will be invoiced in accordance with used time. Invoices shall be sent to the builder at the end of the contract period. There are eigne reglar for invoices. Invoice reglar. 4 types: Månadsfaktura, EA/EO invoice, disputed invoice and final invoice. EA/EO shall on an eign invoice. The amount to which the tenderer shall withdraw and send the invoice shall be issued. The final invoice shall throw more with that text. The work shall be carried out in accordance with the builder's assignments and described. The tender documentation, documents and NS 3420 shall form the basis for pricing. The builder cannot offer storage/barracks place. Contractors must arrange this themselves. The final documentation and final invoice shall be delivered by the end of 2026. QUALIFICATION REQUIREMENTS • Tenderers shall be a legally established company register. • Tenderers must have good economic and financial capacity to fulfil the contract. • Tenderers shall have a good and well-functioning quality assurance system adapted to the delivery. • Tenderers shall have relevant experience from assignments or deliveries of equivalent nature and extent to the assignment in question.
