

Netherlands-Utrecht: Seismic processing services

OJ S 144/2019 29/07/2019

Contract notice

Services

Legal Basis:

Directive 2014/24/EU

Section I: Contracting authority

I.1. Name and addresses

Official name: Energie Beheer Nederland BV

National registration number: 14026250

Postal address: Daalsesingel 1

Town: Utrecht

NUTS code: NL Nederland

Postal code: 3511SV

Country: Netherlands

Contact person: Johannes Rehling

E-mail: johannes.rehling@ebn.nl

Telephone: +31 302339054

Internet address(es):

Main address: <http://www.ebn.nl>

Address of the buyer profile: <https://platform.negometrix.com/PublishedTenders.aspx?tenderid=128748>

I.3. Communication

The procurement documents are available for unrestricted and full direct access, free of charge, at: <https://platform.negometrix.com/PublishedTenders.aspx?tenderid=128748>

Additional information can be obtained from the abovementioned address

Tenders or requests to participate must be submitted to the abovementioned address

I.4. Type of the contracting authority

Body governed by public law

I.5. Main activity

General public services

Section II: Object

II.1. Scope of the procurement

II.1.1. Title

EBN Seismic Processing Services

Reference number: GTO-19-T008

II.1.2. Main CPV code

71352140 Seismic processing services

II.1.3. Type of contract

Services

II.1.4. Short description

With this RFQ, EBN seeks to identify several technically capable seismic processing contractors through a pre-qualification tender. Any contractor that passes this pre-qualification will join a list of approved suppliers and EBN aims to sign a framework agreement with each of these contractors with a zero-hour work commitment. If EBN requires seismic processing services, all approved suppliers will be invited in a 'mini-tender' to bid on a specific work package for either processing newly acquired 2D data or 2D or 3D reprocessing projects.

II.1.5. Estimated total value

II.1.6. Information about lots

This contract is divided into lots: yes
Tenders may be submitted for all lots

II.2. Description

II.2.1. Title

2D Onshore Seismic Processing Services
Lot No: 1

II.2.2. Additional CPV code(s)

71352140 Seismic processing services

II.2.3. Place of performance

NUTS code: NL Nederland
Main site or place of performance:

II.2.4. Description of the procurement

While in some onshore areas the Dutch subsurface data availability is excellent, there are still significant areas in the Netherlands with relatively poor data coverage. In these onshore areas, effective and economically feasible development of geothermal projects is not possible under the current circumstances. In this context, EBN has been asked to embark on a seismic geothermal exploration program (SCAN = Seismische Campagne Aardwarmte Nederland), which will comprise of the reprocessing of vintage data as well as the acquisition of new 2D seismic data in areas with low data density.

As part of the SCAN project, EBN plans to acquire long-offset, high density 2D land seismic data, in areas (Areas a to l) where current data availability is relatively poor (Figure 1, Appendix 3). Appendix 3 also contains a map of the near surface geology model as well as the Elevation model of The Netherlands for illustration purposes.

During the SCAN seismic data acquisition, it is anticipated that some 2,500 km of 2D seismic will be acquired between 2019 and 2023. It is the plan that the data will be processed as it becomes available, so rather than having all data available at once, the data will be processed per line (or per set of lines).

In addition to any newly acquired 2D data, the scope of this processing framework agreement shall also include 2D land vintage data reprocessing. The possible reprocessing data can be either explosives or vibroseis acquisition, carried out between the early 1970s and mid-1990s. The nominal fold may vary from 15 to 120, and the maximum offsets usually range from 2 km to 4 km. Often indenting of the raw field data may be required and the input data might be digital as ACSCII files or scanned paper observer logs or coordinate data. If and when such reprocessing will be required depends on the development of geothermal projects as well as the results achieved by currently ongoing reprocessing projects and their data evaluation.

II.2.5. Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6. Estimated value

II.2.7. Duration of the contract, framework agreement or dynamic purchasing system

Duration in months: 48

This contract is subject to renewal: yes

Description of renewals:

The duration of the framework agreement is four (4) years with two (2) times the option to prolong the framework agreement with one (1) year. The total maximum duration of the framework agreement is six (6) years.

II.2.10. Information about variants

Variants will be accepted: no

II.2.11. Information about options

Options: no

II.2.13. Information about European Union funds

The procurement is related to a project and/or programme financed by European Union funds:
no

II.2.14. Additional information

II.2. Description

II.2.1. Title

3D Onshore Seismic Processing Services
Lot No: 2

II.2.2. Additional CPV code(s)

71352140 Seismic processing services

II.2.3. Place of performance

NUTS code: NL Nederland

Main site or place of performance:

II.2.4. Description of the procurement

At the time of writing this RfQ, no onshore 3D seismic acquisition is planned. However, as EBN sees the possibility of acquiring small 3Ds for deep geothermal projects, the RfQ includes 3D onshore seismic processing services.

II.2.5. Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6. Estimated value

II.2.7. Duration of the contract, framework agreement or dynamic purchasing system

Duration in months: 48

This contract is subject to renewal: yes

Description of renewals:

The duration of the framework agreement is four (4) years with two (2) times the option to prolong the framework agreement with one (1) year. The total maximum duration of the framework agreement is six (6) years.

II.2.10. Information about variants

Variants will be accepted: no

II.2.11. Information about options

Options: no

II.2.13. Information about European Union funds

The procurement is related to a project and/or programme financed by European Union funds:
no

II.2.14. Additional information

II.2. Description

II.2.1. Title

2D, 3D or 4D Offshore Processing Services for Towed Streamer Seismic Acquisition
Lot No: 3

II.2.2. Additional CPV code(s)

71352140 Seismic processing services

II.2.3. Place of performance

NUTS code: NL Nederland

Main site or place of performance:

II.2.4. Description of the procurement

As part of the SCAN project, EBN also plans to acquire one 2D shallow marine seismic line off the western coast of the Netherlands. In addition, the processing framework agreement shall also cover the processing of any new offshore 2D, 3D or 4D towed streamer acquisition data acquired for EBN for O&G exploration activities.

EBN is also currently reviewing the seismic data quality of available vintage data for possible reprocessing projects in the Dutch offshore, either as partner in active production licenses or in open-block areas. As result of this review, EBN may embark on 2D or 3D offshore reprocessing projects in the years to come.

II.2.5. Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6. Estimated value

II.2.7. Duration of the contract, framework agreement or dynamic purchasing system

Duration in months: 48

This contract is subject to renewal: yes

Description of renewals:

The duration of the framework agreement is four (4) years with two (2) times the option to prolong the framework agreement with one (1) year. The total maximum duration of the framework agreement is six (6) years.

II.2.10. Information about variants

Variants will be accepted: no

II.2.11. Information about options

Options: no

II.2.13. Information about European Union funds

The procurement is related to a project and/or programme financed by European Union funds:
no

II.2.14. Additional information

II.2. Description

II.2.1. Title

2D, 3D or 4D Offshore Processing Services for Ocean Bottom Cable (OBC) or Ocean Bottom Node (OBN) Seismic Acquisition
Lot No: 4

II.2.2. Additional CPV code(s)

71352140 Seismic processing services

II.2.3. Place of performance

NUTS code: NL Nederland

Main site or place of performance:

II.2.4. Description of the procurement

In addition to the (re)processing of 2D, 3D or 4D offshore surveys acquired with towed streamer acquisition systems, the processing framework agreement shall also cover the processing of offshore 2D, 3D or 4D Seismic data acquired with Ocean Bottom Cable (OBC) or Ocean Bottom Node (OBN) acquisition systems.

II.2.5. Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6. Estimated value

II.2.7. Duration of the contract, framework agreement or dynamic purchasing system

Duration in months: 48

This contract is subject to renewal: yes

Description of renewals:

The duration of the framework agreement is four (4) years with two (2) times the option to prolong the framework agreement with one (1) year. The total maximum duration of the framework agreement is six (6) years.

II.2.10. Information about variants

Variants will be accepted: no

II.2.11. Information about options

Options: no

II.2.13. Information about European Union funds

The procurement is related to a project and/or programme financed by European Union funds:
no

II.2.14. Additional information

Section III: Legal, economic, financial and technical information

III.1. Conditions for participation

III.1.1. Suitability to pursue the professional activity, including requirements relating to enrolment on professional or trade registers

List and brief description of conditions:

Please see RFQ.

III.1.2. Economic and financial standing

Selection criteria as stated in the procurement documents

III.1.3. Technical and professional ability

Selection criteria as stated in the procurement documents

III.2. Conditions related to the contract

III.2.2. Contract performance conditions

Please see RFQ.

III.2.3. Information about staff responsible for the performance of the contract

Obligation to indicate the names and professional qualifications of the staff assigned to performing the contract

Section IV: Procedure

IV.1. Description

IV.1.1. Type of procedure

Open procedure

IV.1.3. Information about a framework agreement or a dynamic purchasing system

The procurement involves the establishment of a framework agreement

Framework agreement with several operators Envisaged maximum number of participants to the framework agreement: 20 In the case of framework agreements, provide justification for any duration exceeding 4 years:

The FRAMEWORK AGREEMENT of more than 4 years is necessary because the duration of the SCAN programme

Is estimated for a period of four (4) years with (2) times the option to prolong this period with one (1) year. All

Data from the SCAN programme should be processed via the FRAMEWORK AGREEMENT and therefore, it is

Inefficient to start a new European tender procedure.

IV.1.8. Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: yes

IV.2. Administrative information

IV.2.2. Time limit for receipt of tenders or requests to participate

Date: 02/09/2019 Local time: 09:00

IV.2.3. Estimated date of dispatch of invitations to tender or to participate to selected candidates

IV.2.4. Languages in which tenders or requests to participate may be submitted

English

IV.2.6. Minimum time frame during which the tenderer must maintain the tender

Duration in months: 3 (from the date stated for receipt of tender)

IV.2.7. Conditions for opening of tenders

Date: 02/09/2019 Local time: 09:01

Section VI: Complementary information

VI.1. Information about recurrence

This is a recurrent procurement: no

VI.3. Additional information

VI.4. Procedures for review

VI.4.1. Review body

Official name: Rechtbank Midden-Nederland

Town: Utrecht

Country: Netherlands

VI.5. Date of dispatch of this notice

25/07/2019
