Section II: Object

II.1. Scope of the procurement

II.1.1. Title

Seismic acquisition system: Measurement system

Reference number: 423-1391/2023

II.1.2. Main CPV code

38293000 Seismic equipment

II.1.3. Type of contract

Supplies

II.1.4. Short description

The purpose of this seismic acquisition system is to investigate the bedrock and near surface in the Baltic Sea. This will include recording reflections from within the bedrock sequence to investigate the geometry of potential reservoirs for the storage of CO₂, as well as imaging faults (fractures).

II.1.5. Estimated total value

Value excluding VAT: 6 000 000,00 SEK

II.1.6. Information about lots

This contract is divided into lots: no

II.2. Description

II.2.2. Additional CPV code(s)

38293000 Seismic equipment

II.2.3. Place of performance

NUTS code: SE Sverige

NUTS code: SE121 Uppsala län

II.2.4. Description of the procurement

The Geological Survey of Sweden (SGU) want to acquire a modular digital 2D marine seismic system. The recording system shall consist of a so-called marine streamer which can be towed behind a suitable vessel. The marine streamer shall include a so called "active section" which includes arrays of hydrophones for recording the seismic response during data collection. The system shall be a complete stand-alone system and include all necessary components (such as control and power systems) required to operate and record seismic data. The software required to operate the measurement system shall be compatible with a modern rack mounted PC provided by SGU.

This public procurement is aimed for the signal recording system. The signal source system will be announced in another procurement.

The system which is offered for this procurement shall contain all components necessary to register seismic signals, digitize them and transmit the data to a control system which records the data in a computer file.
