Internet address(es):

Main address: <https://permalink.mercell.com/182589223.aspx>

Address of the buyer profile: <http://www.ife.no/>

I.3. Communication

The procurement documents are available for unrestricted and full direct access, free of charge, at: <https://permalink.mercell.com/182589223.aspx>

Additional information can be obtained from the abovementioned address

Tenders or requests to participate must be submitted electronically via: <https://permalink.mercell.com/182589223.aspx>

I.4. Type of the contracting authority

Other type: Foundation

I.5. Main activity

Other activity: Research

Section II: Object

II.1. Scope of the procurement

II.1.1. Title

Radiological impact assessment in the event of discharges of radionuclides from IFE

II.1.2. Main CPV code

73200000 Research and development consultancy services

II.1.3. Type of contract

Services

II.1.4. Short description

Assessment of the impact of discharges of radioactive substances from IFE Kjeller's plants, on the environment.

The tender contest and the documents are partly in Norwegian and partly in English. Any linguistic questions will be answered upon contact.

II.1.5. Estimated total value

Value excluding VAT: 3 000 000,00 NOK

II.1.6. Information about lots

This contract is divided into lots: no

II.2. Description

II.2.2. Additional CPV code(s)

90711000 Environmental impact assessment other than for construction, 90712000 Environmental planning, 90711100 Risk or hazard assessment other than for construction

II.2.3. Place of performance

NUTS code: NO08 Oslo og Viken

II.2.4. Description of the procurement

The Institute for Energy Technology (IFE) in Kjeller, Norway, holds a permit for liquid and airborne discharges from our facilities, issued pursuant to Act of 13 March 1981 No.6 Concerning Protection Against Pollution and Waste. Due to the organization splitting into several separate companies, IFE is currently in the process of applying for new regulatory permits for liquid and airborne discharges to the environment during normal operations for three divisions at Kjeller. The regulatory application process requires that new environmental impact assessments must be made for all discharges. In this regard, IFE seeks assistance for the purpose of performing the new impact assessment as a basis for the new permit applications.

Due to new requirements set by the Norwegian authorities (DSA), the environmental impact assessment must be performed by dose calculation models handling e.g., pulse discharges, doses to the public and doses to biota. In addition, IFE has requirements that the work must be performed such as to meet the organizations future needs. As a result, IFE has decided that the dose calculations for the public and biota shall be performed using the Ecolego and ERICA software, respectively.

The objective of the tender contest is to enter an agreement with a partner that can contribute with the necessary environmental impact assessment.

The tenderer's personnel shall perform the following tasks in accordance with Pt. 4

Scope of this specification:

- The use of ECOLEGO and ERICA models for impact assessment of radioactive substances to air and water
- The model must cover impacts both to the public and the environment
- The model must be able to assess pulse discharge to water
- The model must be able to assess both pulse and continuous discharge to air

II.2.5. Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6. Estimated value

Value excluding VAT: 3 000 000,00 NOK

II.2.7. Duration of the contract, framework agreement or dynamic purchasing system

Duration in months: 36

This contract is subject to renewal: no

II.2.10. Information about variants

Variants will be accepted: no
