II.2.4. Description of the procurement

Larvik Municipality would like to procure a digital interaction tool between the various service areas in the health and care services. The system will be used by, for example, service offices, 24-based units and home-based units.

The system's flexibility for this and future development of services are therefore vital. The system must therefore have a high degree of flexibility and it must be easy to administer for the district's system administrator.

The system must support information flow in the interaction between different service areas within the health and care services. The work processes for interaction in the service areas and underlying units form the basis for what information and data we want the system to handle, the set-up of accesses and viewing design on different platforms/digital systems. All departments and services must always be able to see updated information.

There can be an overview of institution places, rolling stays, users that require various services, mapping, check lists, etc.

II.2.5. Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents
