II.1.4. Short description

There is a collection scheme for food waste and plastic packaging, where the waste is primarily collected in bags and sacks, in the municipalities served by Vesar AS (the Vesar region) and their cooperating municipalities, Sandefjord and Larvik (~225 000 inhabitants), but

containers for plastic packaging are also used in the Vesar region. In addition there are some customers in the Vesar region and Sandefjord who have a sack system for residual waste.

The Vesar region also offers to collect garden waste in paper sacks.

Biodegradable bags are used in the current food waste system, but a system is being considered for recycling reject plastic at the treatment facility and a transition to plastic bags could occur during the contract period.

Sacks for the containers for plastic packaging are being considered in order to be able to check customers' sorting quality.

An offer is being considered for sacks for textiles in the Vesar region, plastic sacks could, therefore, be procured for this purpose during the contract period.
