II.1.4. Short description

The British Museum wishes to establish a non-exclusive, non-binding framework agreement for the provision of collection storage furniture with a number of contractors. The framework will be the primary route by which the British Museum will procure collection storage furniture across its estate for a period of 4 years. A complete end-to-end service is required including design, manufacture, installation and initial maintenance support. The framework will be used to appoint a contractor, or contractors, to fit out the British Museum Archaeological Research Collection (BM_ARC) facility when its construction has been completed. The BM_ARC will contain collection storage rooms with an approximate total floor area of 9 250 square meters.

II.2.4. Description of the procurement

This lot is designed to cater for the commission of bespoke storage solutions to be determined at call-off stage which may be required by the British Museum. Due to the nature and breadth of the Museum's collection, there may be objects the storage needs for which are not met by the five specified lots outlined above. It is therefore anticipated that the development of a unique provision to meet the unknown needs of a specific item or grouping within the collection will be required. No sample lot specification is available, as a result. However, the Museum's overarching standards for storage systems outlined within this framework will apply.
