II.1.4. Short description

The competition is for the delivery of an electronic patient journal system (EPJ) This means a complete system for the nursing and care sector in the municipalities and it shall ensure that daily operations are carried out as optimally as possible. The invitation to tender does not include EPJ to the medical emergency service and the Corona testing and vaccination centre.

There will be a strong focus on efficient work processes and quality of the services in the municipalities and a new EPJ system must support this. The system will therefore have close integration between the administrative systems and not least the professional systems in the municipality, so that double registrations and unnecessary work processes are eliminated. See the procurement documents for further information.
