II.2.4. Description of the procurement

The contracting authority needs to establish a new operations platform for processing, storage, and network, which will run in parallel to the current central operations platform. This contest is for the establishment of a framework agreement and maintenance contract for the delivery of servers for the new operations platform.

The framework agreement will cover the contracting authority's need for establishing and expanding the new operations platform's capacities and functionality in the server area. The need is due to an increased need for capacity, and the fact that the equipment in the current central operations platform has reached its technical lifetime. Furthermore, the contracting authority has a need for maintenance of the delivered equipment after call-off contracts for procurements under the framework agreement have been held. Otherwise the contracting authority needs technical consultancy services related to the system. The framework agreement and maintenance contract will cover these needs.

See the tender documentation and annexes for further information on the terms, requirements, and prerequisites for the procurement.
