Norway – Backup or recovery software package – Market survey: Back-up system for Oslo kommune Planning and Building Agency

OJ S 111/2026 11/06/2026

Prior information notice or a periodic indicative notice used only for information

Supplies

1. Buyer

1.1. Buyer

Official name: Oslo kommune v/ Plan- og bygningsetaten

Email: postmottak@pbe.oslo.kommune.no

Legal type of the buyer: Body governed by public law, controlled by a local authority

Activity of the contracting authority: General public services

2. Procedure

2.1. Procedure

Title: Market survey: Back-up system for Oslo kommune Planning and Building Agency

Description: The contracting authority announced 30.04.2026 a competition under the EEA threshold with Doffin reference: 2026-107841 on "Procurement of a backup system (backup and data recovery)". No acceptable tenders were received and the competition was cancelled. The tender documentation in the original competition is available here:

<https://app.artifik.no/procurements/5085> [<https://app.artifik.no/procurements/5085>]

The contracting authority needs updated feedback from the market in order to * improve the requirement specifications * facilitate increased competition * ensure that the contracting authority knows the advantages and disadvantages of different delivery models * gain better insight into the market to ensure that the estimated value of the procurement is realistic It is possible to answer some of the questions and all answers will be included in the evaluation of further process. About the assignment The contracting authority needs a new backup system for backup and backup operation. The procurement is for the delivery of a complete back-up system, including local infrastructure, external copy, software and accompanying services. The system shall ensure high availability, data integrity and robustness toward security events. The Planning and Building Agency is responsible for the municipality's general area planning, planning and building application management, map management as well as map and sharing shops. The agency currently has approx. 550 employees and it shall be an inditator in Oslo's urban development. The contracting authority's IT environment is in a major change process where the local data centre will be phased out in the next few years. The local data centre and backup system must ensure safe and reliable operation, at the same time as flexibility in the system. The contracting authority needs a comprehensive backup system that covers: * Local backup in separate data centre * Secondary backup location in the supplier's cloud with location in Norway (offsite). We particularly want input on: * what drives costs in such systems * whether the requirements have been too detailed or limiting * alternative solution design * how the competition should be designed Based on the input, the contracting authority will assess: * adjustment of requirements * changed contract strategy * any new notice

Internal identifier: 5872

2.1.1. Purpose

Main nature of the contract: Supplies

Main classification (cpv): 48710000 Backup or recovery software package

Additional classification (cpv): 72900000 Computer back-up and catalogue conversion services , 72910000 Computer back-up services, 72317000 Data storage services, 72310000 Data-processing services, 72300000 Data services, 30200000 Computer equipment and supplies, 30234000 Storage media, 48000000 Software package and information systems, 48800000 Information systems and servers

2.1.2. Place of performance

Country subdivision (NUTS): Oslo (NO081)

Country: Norway

2.1.4. General information

Legal basis:

Directive 2014/24/EU

3. Part

3.1. Part: PAR-0000
