2. Procedure

2.1. Procedure

Title: System for enabling the characterization of the oxygen environment in cell and tissue models

Description: Tenders are sought for the Supply, Delivery, Installation, and Commissioning of a System for enabling the characterization of the oxygen environment in cell and tissue models for Trinity College Dublin. The system will be required to convert standard cell culture plates into a smart reader that senses real-time cellular metabolic changes in response to potential therapeutics. Vendors must provide training for staff, technical support, and warranty. Proposals should detail specifications, pricing, delivery timelines, and after-sales service options. Preference will be given to systems demonstrating ease of use, reliability, and cost effectiveness. Submissions should include company profiles and references from previous installations.
