Norway – Monitoring and control services – Market survey - Condition based operational monitoring of technical installations in nurseries.

OJ S 113/2026 15/06/2026

Prior information notice or a periodic indicative notice used only for information Services

1. Buyer

1.1. Buyer

Official name: Oslo kommune v/ Oslobygg KF

Email: postmottak@obf.oslo.kommune.no

Legal type of the buyer: Body governed by public law

Activity of the contracting authority: General public services

2. Procedure

2.1. Procedure

Title: Market survey - Condition based operational monitoring of technical installations in nurseries.

Description: 1. Introduction OsloBygg KF is considering to procure a digital service for condition based operational monitoring of technical installations in nurseries. The objective of the market survey is to gain better insight into the market and input from suppliers on what systems are available, what can be delivered and how such services can normally be introduced. The market survey is not a competition and the contracting authority is not requesting tenders at this point in time. Participation in the market survey gives no rights or advantages in any later procurement. 2. Provisional need The contracting authority would like input on digital systems that can monitor technical components in nurseries by using sensors, audio analysis, vibration analysis or other relevant measurement parameters. The analysis shall be carried out by KI or ML and it shall automatically alarm in the event of deviations and errors. The system is particularly relevant for: * ventilation aggregates * engines * Fans * Pumps * other relevant technical components The aim of any system is to uncover abnormal operations, errors or wear at an early stage, so that the contracting authority can carry out more targeted and preventive maintenance. The system ought to be able to contribute to better operational security, reduced energy consumption, fewer operational deviations and a better overview of the condition of the technical installations. 3. Input from the market The contracting authority would like general input from suppliers on: * what systems and technologies are available in the market * the types of technical installations and components that can be monitored * if the systems can be used on existing installations without comprehensive reconstruction * how notification, reporting and visualisation normally works * whether the systems can be integrated with MOM systems. * what gains and effects suppliers believe such solutions could provide

Internal identifier: 6104

2.1.1. Purpose

Main nature of the contract: Services

Main classification (cpv): 71700000 Monitoring and control services

Additional classification (cpv): 31620000 Sound or visual signalling apparatus, 32000000 Radio, television, communication, telecommunication and related equipment, 48000000 Software package and information systems, 71000000 Architectural, construction, engineering and inspection services, 71300000 Engineering services, 71600000 Technical testing, analysis and consultancy services, 71630000 Technical inspection and testing services, 71631000 Technical inspection services, 72000000 IT services: consulting, software development, Internet and support, 72200000 Software programming and consultancy services, 72500000 Computer-related services, 72514000 Computer facilities management services, 72510000 Computer-related management services, 72514200 Facilities management services for computer systems development, 79711000 Alarm-monitoring services, 38000000 Laboratory, optical and precision equipments (excl. glasses), 35000000 Security, fire-fighting, police and defence equipment, 51000000 Installation services (except software), 64000000 Postal and telecommunications services, 71620000 Analysis services

2.1.2. Place of performance

Country subdivision (NUTS): Oslo (NO081)

Country: Norway

2.1.4. General information

Legal basis:

Directive 2014/24/EU

3. Part

3.1. Part: PAR-0000
