City of Bradford Metropolitan District Council ('the Council') is seeking to procure a service contract with an expected duration of 12 years with a possible extension of up to a further 3 years, for the provision of services for the reception, storage, pre-treatment, recycling and energy recovery from local authority collected waste (municipal waste) arising in Bradford. The appointed service provider will be expected to provide a residual waste treatment solution to reduce reliance on landfill of municipal waste sufficient to meet the Council's landfill diversion targets and to provide for the capture of recyclate and/or compost and value recovery from the residual municipal waste stream, including the provision of all associated off-take markets. To achieve this, the Council is seeking a treatment solution with energy recovery. The Council expects the contract to include: a 12 year operational service period from 2017/18 until 2029 /30; and provision for an annual extension for a maximum aggregated period of 3 years beyond the initial 12 year operational service period. The financial value for the extension period is estimated to be in the order of £14m per year. Further information on total quality and scope is available in the Information Memorandum.
