2.1. Procedure

Title: Provision of Services for Electrical Maintenance Repair and Callout to 3 Landfill Sites and Leachate Infrastructure Maintenance in County Louth

Description: Louth County Council has three closed landfills which are under licence by the EPA. At site Number 1-Whiteriver landfill, there are seven side slope risers each with a leachate submersible pump and level sensor. The depth of these pumps varies from between 30 and 80 metres. The Council as part of licence conditions are required to maintain a level below 1 metre in depth in each side slope riser sump. The lagoon level is required to be below 1.90 metres. All side slope risers and lagoons are linked by level sensors, programmable logic controllers and underground wiring to a scada system. The site is supplied by single and three phase supply. At this site there are several buildings including a weighbridge, internal and external WC, office, store, canteen, engine compound WC, engine compound switch room and engine compound store/office. Each building has lighting circuits and power outlet sockets (note no power outlet sockets in WC's). In addition, there are several external lighting circuits, hot water boilers, fixed heaters and groundwater pumps. There are seven external control panels associated with the side slope risers and a number of external control panels associated with the aeration unit, surface water lagoon, generator switch over point, electrical kiosks. There are also several internal control panels in the office, weighbridge and engine compound rooms. At site Number 2- Drogheda landfill, there are two sumps used for pumping sewage and surface water. Both have a duty and standby pumps and associated control panels. At the flare compound there are electrical sockets and electrical panel which operates an air compressor. At site Number 3-Dundalk landfill there is one sump with a duty and standby pump plus associated control panel which pumps to the sewer. All sites will require one full electrical test during the duration of the contract and testing of RCBO's every six months. Ropes and chains are tested every six months. The contract may require the isolation of pumps and the lifting of pumps at Drogheda and Dundalk every six months to facilitate testing and may require chain replacement.

5.1.1. Purpose

Main nature of the contract: Services

Main classification (cpv): 90531000 Landfill management services

Additional classification (cpv): 51100000 Installation services of electrical and mechanical equipment, 51110000 Installation services of electrical equipment, 51120000 Installation services of mechanical equipment, 51200000 Installation services of equipment for measuring, checking, testing and navigating, 51300000 Installation services of communications equipment , 51500000 Installation services of machinery and equipment

5.1.2. Place of performance

Country subdivision (NUTS): Mid-East (IE062)

Country: Ireland

5.1.3. Estimated duration

Duration: 4 Years

5.1.5. Value

Estimated value excluding VAT: 118 800,00 EUR

5.1.6. General information

Procurement Project not financed with EU Funds.

The procurement is covered by the Government Procurement Agreement (GPA): yes

5.1.7. Strategic procurement

Aim of strategic procurement: No strategic procurement

5.1.10. Award criteria

Criterion:

Type: Price

Description: @40%

Category of award weight criterion: Weight (percentage, exact)

Award criterion number: 40

Criterion:

Type: Quality

Description: @60%

Category of award weight criterion: Weight (percentage, exact)

Award criterion number: 60

5.1.15. Techniques

Framework agreement:

Framework agreement, without reopening of competition

Information about the dynamic purchasing system:

No dynamic purchase system

5.1.16. Further information, mediation and review

Review organisation: The High Court of Ireland

Organisation providing offline access to the procurement documents: Louth County Council_381

Organisation providing more information on the review procedures: The High Court of Ireland

6. Results

Maximum value of the framework agreements in this notice: 118 800,00 EUR

6.1. Result lot identifier: LOT-0001

Winner selection status: At least one winner was chosen.

Framework agreement:

Maximum value of the framework agreement: 118 800,00 EUR

6.1.2. Information about winners

Winner:

Official name: APC Enviro Ltd

Tender:

Tender identifier: 000163356

Identifier of lot or group of lots: LOT-0001

Subcontracting: No

Contract information:

Identifier of the contract: 441300

Date of the conclusion of the contract: 22/05/2026

6.1.4. Statistical information

Received tenders or requests to participate:

Type of received submissions: Tenders submitted electronically

Number of tenders or requests to participate received: 2
