Title: ENQEIR823 - Marine Survey Services Framework

Description: EirGrid has concluded its competition to fulfil its requirement for the provision of a range of specialised offshore surveys, studies and reports from strategic partners. EirGrid has established a multi-party Framework Agreement for the provision of these services. These services will cover all of EirGrid's Offshore Wind and HVDC/AC Interconnection requirements

for the immediate future. EirGrid is initiating an offshore infrastructure programme of work in response to the Government's Policy Statement on the Framework for Phase Two Offshore Wind. Under the policy, EirGrid will support the transformation of Ireland's power system by developing offshore grid transmission infrastructure, which will connect offshore projects to onshore nodes on the south coast of Ireland. EirGrid's offshore investment will facilitate a doubling of Ireland's renewable capacity from 5GW to 10 GW, improve our energy security; and reduce our reliance on imported fossil fuels. This will include offshore substations and submarine cables connecting them to the onshore grid. Offshore wind developers will compete for supports via auctions, known as ORESS1 and ORESS2, to develop windfarms that connect to the offshore substations developed by EirGrid for ORESS2. The Framework Agreement period will be for an initial duration of 5 years with the option to extend annually for up to an additional 3 years. Please note that the estimated value of €300,000,000 takes into account the potential 8 year duration of the Framework.
