2.1. Procedure

Title: 410083 Mapping the condition of buildings in the housing portfolio 2026-27

Description: The assignment is for mapping the technical conditions of buildings administered by Bærum kommune Eiendom (BKE). This procurement concerns housing and comprises approx. 200,000 m² and approx. 220 buildings. The mapping will be carried out based on NS 3424:2012/G2:2020 and the registrations will be built in accordance with NS 3451:2022 Building section table and system code table for buildings and the accompanying outside areas. The mapping shall result in one final report per property/building, and BKE's own templates for reporting shall be used and it shall be included in Plania. The purpose of the condition report is to get an overview of the lag in the buildings. Together with proposals for measures with cost, this shall give a starting point for a 10 year maintenance plan for each property. The Contracting Authority has assessed the climate and environmental impact connected to this procurement of consultancy engineering services. The services mainly consist of consultancy and analysis services, and the procurement has, in its nature, a climate footprint and an environmental impact that is immaterial, cf. the procurement regulations § 7-9 fifth paragraph.
