2. Procedure

2.1. Procedure

Title: Collection of biological material for a gene bank for wild salmon and sea trouts in Hardangerfjorden with the accompanying assignments as well as coordination

Description: The contract is for regional project coordinator function in the Hardanger region for the operation and continuation of the gene bank programme for wild salmon and sea trout in the Hardangerfjord. The assignment includes coordination of activities connected to the collection and preservation of genetic material, contact and interaction with local rightful owners, landowners, fish teams, municipalities and other actors, coordination of logistics related to fish, biological material, equipment and personnel, organisation of meetings and information flow, as well as coordination with relevant public authorities and cooperation partners.

Procedure identifier: c4e3d0c1-29bf-4f2d-abdc-3fff37ff71d4

Internal identifier: 26-10043-3

Type of procedure: Other single stage procedure

2.1.1. Purpose

Main nature of the contract: Services

Main classification (cpv): 73200000 Research and development consultancy services

Additional classification (cpv): 79421000 Project-management services other than for construction work

2.1.2. Place of performance

Postal address: Steinsdalsvegen 148

Town: Norheimsund

Postcode: 5600

Country subdivision (NUTS): Vestland (NO0A2)

Country: Norway

2.1.4. General information

Additional information: The Norwegian Veterinary Institute intends to enter into a contract with Hardangerfjord Villfisklag without a prior competition, cf. the Public Procurement Regulations § 13-4 letter b. Hardangerfjord Villfisklag has for many years had a central role in the execution of gene bank work in the Hardanger region and has unique local competence in the relevant

waterways, stocks and the actors involved. The delivery requires established relationships with rightful owners, landowners and local crews, as well as experience with coordination of the collection, transport and storage of biological material. The project coordinator role assumes in-depth knowledge of established collaboration structures, local conditions and practical implementation of the activities in the affected waterways. The Norwegian Veterinary Institute estimates that no other tenderers have an equivalent combination of local anchoring, operative competence, established networks and experience with coordination of the gene bank project in Hardangerfjorden. The Norwegian Veterinary Institute therefore estimates that the service can only be provided by one supplier for technical and professional reasons and that there are no real alternatives in the market.

Legal basis:

Directive 2014/24/EU
