#### 2.1. Procedure

Title: 1105601 UiO Life Science user equipment K935 Optical microscopy

Description: Statsbygg constructs the new Life Sciences Building (LVB) for the University of Oslo and Oslo University Hospital on behalf of the Ministry of Education and Research and South-East Health as the co-contracting authority. The building shall be the workplace for approx. 1,600 employees and 1,600 students. Start up for the excavation and ground work was the second quarter of 2019 and the planned completion is at the end of 2026. Various professional environments shall work multi-disciplinary here to develop new solutions for major challenges within health and sustainability with access to the best and most modern equipment required to carry out world class research, teaching and innovation.

Internal identifier: 2024/3591

Type of procedure: Open

The procedure is accelerated: no

Main features of the procedure: Statsbygg requests, in connection with project 1105601 UiO Life Science, user equipment for tenders for various microscopes, 55 in number. Microscopes shall be procured for educational purposes and research. The type of microscopes varies from microscopes for course laboratories, cell laboratories and regular laboratories, with and without fluorescent, to higher research with Point Scanning Confocal microscope, Light-Sheet microscope, High Content Imaging Platform, Atomic force Microscope (AFM microscope), etc. There will be 7 sub-contracts labelled A-G, all with one microscope each, with the exception of Sub-Contract A, which includes 49 microscopes of varying complexity. Sub-contract C, D, E, F and G are advanced microscope set-ups. This procurement uses the exclusionary provision in PPR § 7-9 (4), as it is clear that the climate and environmental requirements in the procurement will result in a better climate and environmental effect than the use of the award criteria. The climate impact identified for the procurement is connected to the extraction of raw materials for the production and production of the equipment and components thereof. The product requirement levels are at a level where, according to our knowledge and experience from the market, the market is very unlikely to be able to deliver products that, in a competition, can document a clearly better overall climate and environmental effect. Therefore, in order to reduce the climate and environmental impact of the procurement, there are

requirements for the equipment's light sources, repairability and updates in accordance with the principles in the waste hierarchy. These requirements will extend the lifetime of the equipment and the following reduce the need for new equipment and the accompanying extraction and extraction of raw materials for production and production. Furthermore, there are clearly defined functionality requirements connected to upgrading options and the offered equipment's flexibility, which together are expected to have the effect that it will minimise, or even exclude, the need to replace the equipment with new equipment in order to achieve future functionality that is currently not available on the market. Statsbygg's assessment is therefore that in order to reduce the climate and environmental impact of this procurement, the exclusion provision in the Public Procurement Regulations § 7-9 (4), as it is clear that the use of climate and environmental requirements has a better climate and environmental effect than the use of the award criteria as described in PPR § 7-9 (2).

#### **2.1.1. Purpose**

Main nature of the contract: Supplies

Main classification (cpv): 38510000 Microscopes

Additional classification (cpv): 38000000 Laboratory, optical and precision equipments (excl. glasses), 38513100 Inverted microscopes, 38514200 Scanning probe microscopes, 38515200 Fluorescent microscopes, 38518200 Stereo or dissecting light microscopes, 38634000 Optical microscopes

#### **2.1.2. Place of performance**

Country subdivision (NUTS): Oslo (NO081)

Country: Norway

#### **2.1.4. General information**

##### **Legal basis:**
