The contracting authority can replace climate and environmental considerations in the award criteria with climate and environmental requirements in the requirement specification, if it is clear that this gives better climate and environmental effect.

Several different requirements are made in the requirement specification, including: - All areas that must be developed shall have an asphalt-EDP that is lower than 45 kg/tonne in accordance with NS-EN 15804+A2:2019. - Charging stations shall be established for electric lorries. - Cleaning shall be carried out with environmentally friendly products.
