Body governed by public law

I.5. Main activity

Health

Section II: Object

II.1. Scope of the procurement**II.1.1. Title**

PR3949 — GOSH — ECMO Replacement.

Reference number: DN304939

II.1.2. Main CPV code

33100000 Medical equipments - AA01

II.1.3. Type of contract

Supplies

II.1.4. Short description

Great Ormond Street Hospital for Children NHS Foundation Trust seeks to replace ten ECMO (Extra Corporeal Membrane Oxygenation) machines, alongside eight water heaters. tee in the summer of 2017.

ECMO is used for babies and children with severe cardiac and/or respiratory failure, including those receiving cardiothoracic transplants. Water heaters are essential to the functioning of ECMO support.

The replacement of these pieces of equipment is critical to ensuring the sustainability of intensive care services across the Trust.

ECMO is a technique that allows babies and children with severe respiratory difficulties to have the function of their lungs (and also their heart if needed), supported with a mechanical pump and artificial lung. Children with severe respiratory failure who are unresponsive to support with a ventilator and drug therapy require extracorporeal life support. This is a complex technique using a modified heart/lung bypass machine.

II.1.5. Estimated total value

II.1.6. Information about lots

This contract is divided into lots: no

II.2. Description

II.2.2. Additional CPV code(s)

33100000 Medical equipments

II.2.3. Place of performance

NUTS code: UKI London

II.2.4. Description of the procurement

ECMO is a technique that allows babies and children with severe respiratory difficulties to have the function of their lungs (and also their heart if needed), supported with a mechanical pump and artificial lung. Children with severe respiratory failure who are unresponsive to support with a ventilator and drug therapy require extracorporeal life support. This is a complex technique using a modified heart/lung bypass machine.

ECMO involves connecting a child's internal circulation to an external blood pump and artificial lung. A catheter is placed in the right side of the heart and carries blood to a pump, then to a membrane oxygenator, where gas exchange of oxygen and carbon dioxide takes place. The blood then passes through tubing back into either the venous or arterial circulation.

II.2.5. Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6. Estimated value

II.2.7. Duration of the contract, framework agreement or dynamic purchasing system

Start: 01/02/2018 End: 31/01/2023

This contract is subject to renewal: no

II.2.10. Information about variants

Variants will be accepted: no

II.2.11. Information about options

Options: no

II.2.13. Information about European Union funds

The procurement is related to a project and/or programme financed by European Union funds:
no
