II.1.4. Short description

Members of the shared service alliance are seeking to embed a more optimal method for the procurement and deployment of engineering and technology solutions. The engineering and technology solutions marketplace dynamic purchasing system (DPS) is to access a greater breadth of capable supply chain organisations to utilise existing and commonly used engineering and technology solutions to address identified business challenges. The

engineering and technology solutions marketplace DPS will look to create greater visibility of work packages to the supply chain to enable greater competition to achieve improved outcomes and value. There are 4 categories in the dynamic purchasing system.

- 1) Digital;
- 2) Engineering services;
- 3) Asset maintenance and management;
- 4) Manufacture.

These categories are broken down into a number of sub-categories (identified in the procurement documents) for which candidates can apply for pre-qualification to gain access to award stage work packages.
