Electronic submission of tenders and requests to participate: <https://www.delta-esourcing.com/respond/444TR539JE>

**I.2. Type of the contracting authority**

Body governed by public law

**I.3. Main activity**

**I.4. Contract award on behalf of other contracting authorities**

The contracting authority is purchasing on behalf of other contracting authorities: no

**Section II: Object of the contract**

---

**II.1. Description**

**II.1.1. Title**

Stack Emission Monitoring 2015.

**II.1.2. Type of contract and place of performance or delivery**

Supplies  
Purchase  
NUTS code UKI London

**II.1.3. Information about a framework agreement or a dynamic purchasing system (DPS)**

**II.1.4. Short description of the contract or purchase(s)**

Emission measurement equipment. Environmental monitoring other than for construction. Air pollution monitoring or measurement services. LondonWaste Ltd (The Company) own and operate the EcoPark Energy centre located in Edmonton, London. The Energy Centre has five boilers burning approximately 500 000 t of both trade and domestic refuse per year in a continuous 24-hour operation, 7 days per week. The waste is delivered by road via the

weighbridges/gate house by various types of transport. The waste is tipped and held in storage bunkers. Waste is fed by three 5 m<sup>3</sup> grabbing cranes from the storage bunkers to the feed chutes of each boiler. Each of the water tube boilers is operated to achieve an evaporation rate of 40 tonnes per hour, at a steam pressure of 41.5 Bar and temperature of 415 °C. Material which remains after the incineration process is transferred to the residual conveyors for onward transfer for further treatment and recycling.

The flue gas treatment plant consists of 4 streams each designed to treat up to 137,500 Nm<sup>3</sup> /h of flue gas. Each boiler may deliver up to 110 000 Nm<sup>3</sup>/hr of flue gas at a temperature of around 190 °C.

The superheated steam from the boilers is used to drive four single cylinder, 17 stage turbines to generate electrical power at 11 kV. This power is used for the house load with the surplus exported to the National Grid via two step-up 11/33 kV transformers. The power exported to the Grid averages 32 MWh.

This specification is for the supply and installation of a brand new stack emission monitoring system that is MCERTS accredited for use in a waste incineration plant and able to comply with the Industrial Emissions Directive (IED). The procurement also includes testing, installation and commissioning of the system by the successful supplier. Provision of a comprehensive maintenance contract to ensure the system is maintained and working continuously is to be included.

All communication must be directed via the Delta e-sourcing portal. You will need to register as a supplier on Delta which is free and takes less than 10 minutes.

The PQQ Access Code is 444TR539JE. You will be required to complete the PQQ and submit it together with all relevant attachments before the stated deadline. Failure to comply will result in your organisation being excluded from the process. A copy of the Invitation to Tender is provided in excel format for viewing only at this stage. Only those suppliers that are shortlisted will be invited to participate in the tender process. Thank you for your co-operation.

#### **II.1.5. CPV code(s)**

38433200 Emission measurement equipment, 90711500 Environmental monitoring other than for construction, 90731400 Air pollution monitoring or measurement services

#### **II.1.6. Information about the Government Procurement Agreement (GPA)**

The procurement is covered by the Government Procurement Agreement: no

#### **II.2. Total value of the contract/lot**

##### **II.2.1. Total value of the contract/lot**

### **Section IV: Procedure**

---

#### **IV.1. Type of procedure**

##### **IV.1.1. Type of procedure**

Accelerated restricted

#### **IV.2. Award criteria**

##### **IV.2.1. Award criteria**

The most economically advantageous tender in terms of

1. Price. Weighting 60
2. Quality. Weighting 40

##### **IV.2.2. Information about electronic auction**

An electronic auction has been used: no

### **IV.3. Administrative information**

#### **IV.3.1. File reference number attributed by the contracting authority**

Stack Emission Monitoring 2015

#### **IV.3.2. Previous publication concerning this procedure**

no

## **Section V: Award of contract**

---

### **V.1. Date of conclusion of the contract**

14.11.2015

### **V.2. Information about tenders**

Number of tenders received by electronic means: 4

### **V.3. Name and address of the contractor**

Official name: SICK UK Ltd

Postal address: 39 Hedley Road

Town: St Albans

Postal code: AL1 5BN

Country: United Kingdom

E-mail: [paul.morgan@sick.co.uk](mailto:paul.morgan@sick.co.uk)

Telephone: +44 1727831121

Internet address: [www.sick.co.uk](http://www.sick.co.uk)

### **V.4. Information on value of the contract/lot**

Initial estimated total value of the contract/lot:

Value: 580 000 GBP

excluding VAT

### **V.5. Information about subcontracting**

## **Section VI: Complementary information**

---

### **VI.1. Information about European Union funds**

The procurement is related to a project and/or programme financed by European Union funds:

no
